

# Microcomponent Storage System

An expandable drawer storage system, ideal for surface mounted devices and other small components. The system comprises a base plinth, on to which individual drawer units may be snap-fitted, to form a stack.

A drawer unit comprises an outer housing, a removable drawer, and a choice of vacuum formed trays. In addition, there is the option of a tray containing 42 round, removable containers with self-adhesive labels. Manufactured in black, carbon-loaded polystyrene.

The round containers are also available individually, with a choice of either 17.5mm or 13mm internal height.

## Dimensions

	H	W	D
Drawer unit	32	273	251
Base plinth	7	273	251
Round containers	H = 13/17.5, Dia = 26
