

Applications

Smart Phones

Tablets

Handheld Gaming Systems

Payment Systems

Ticketing Systems

Bluetooth Pairing

Overview

Amphenol RF offers a wide variety of Near Field Communication (NFC) internal antennas that are easy to use and offer high-performance capabilities to support NFC-Forum wireless standards. NFC antennas are available in standard configurations with adhesive mount options. These short range internal antennas operate at 13.56 MHz and are well suited for compact IoT devices such as smart phones, tablets and gaming consoles and within POS terminals and ticketing systems, and are commonly used in devices that require pairing.

Features and Benefits

- Ideal for compact IoT applications
- Adhesive mount options, with and without cable
- Operates at 13.56 MHz
- Designed to support NFC-Forum wireless protocols
- Short range data transfer capabilities
