**Subject: XP Power SDC320 & SDR250 Series END-OF-LIFE (EOL)**

**End of life date: Immediately 7/31/23, No last time buy.**

To whom it may concern,

Please note that the SDC320 & SDR250 series are obsolete with immediate effect due to our supplier's MOQ greater than our annual sales.

For the SDC320 series, the GCS350 is a potential alternative for a limited range of single output voltages, or the configurable LP configurable series offers single or dual outputs at all output voltages. Data sheets attached.

For the SDR250 series, the GCS250 is a potential alternative for a limited range of single output voltages, or the configurable LP configurable series offers single or dual outputs at all output voltages. Data sheets attached.

Best Regards,

*Bonnie Ziegler*
