

**EAN:** 4013288227638

**Part number:** 05300306001

**Article number:** 9622

**Size:** 240x240x70 mm

**Weight:** 972 g

**Country of origin:** CZ

**Customs tariff number:** 82054000

- Storage solution to flaunt for all Tool Rebels
- Belt holster for perfect tool organization and instant access to the required tools
- Screwdriver for Phillips-head screws Phillips-Recess, Robertson (square head) and slotted, and chiseldriver for screwdriving, chiselling, mortising
- Some of the tools come with a ball handle to achieve high axial forces and particularly high torques during manual screwdriving

The tool set for the belt. The tool holster has 5 zones for inserting and accessing the required tools at any time. The holster has a robust construction, is made of tear-resistant material and is also suitable for use in adverse conditions. The included tools can be supplemented or exchanged individually. The holster can be worn on the hips. Ideal for mobile use at different locations. Kraftform Plus handle for comfortable ergonomic screwdriving, avoiding blisters and calluses. Hard handle zones for high working speeds, while soft handle zones guarantee a high torque transfer. Includes some tools with Lasertip: The tips of Wera Lasertip screwdrivers are microscopically roughened with laser beams. This rough surface "bites" into the screw head and unintentional slipping is a thing of the past. "Take it easy" tool finder with colour coding by profile and size stamping - for quick and easy identification of the required tool.

Including chiseldriver with pound-thru hexagonal blade made of premium bit material which ensures power transmission without loss even at hammer blows.

Some of the screwdrivers are equipped with ball handles, which allows a lot of pressure to be transferred while screwdriving. The palm encloses the handle from above, which allows high torques and high axial forces.

Screwdriver sets in belt holster

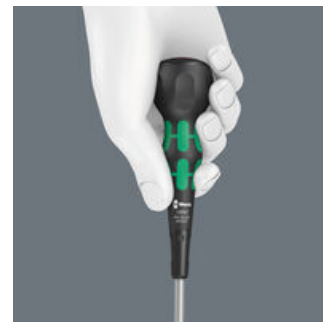

**LIMITED  
EDITION**

Can be attached to your belt

The belt pouch is made of robust material and can be attached to the belt.

Kraftform Ball-Grip for high torques

The ergonomically shaped Kraftform Ball-Grip fits perfectly in the hand. Its convex shape allows the transmission of high torques.

Wera Chiseldriver

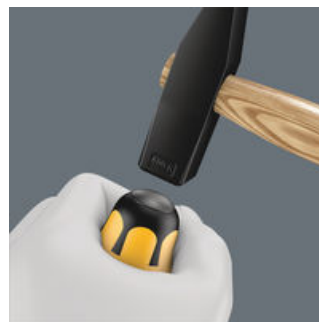

The Wera chiseldriver for screwdriving, chiseling, mortising and slackening stuck screws. With multi-component Kraftform handle for fast and smooth work.

The chiseldriver with pound-thru blade

The chiseldriver's pound-thru hexagonal blade made of premium bit material allows power transmission without loss even at hammer blows. The tough tempered material prevents the blade from splintering or breaking.

The chiseldriver with integrated impact cap

With its integrated impact cap, the chiseldriver is equipped to increase service life and reduce risk of splintering. Nevertheless, always wear protective goggles!

Lasertip prevents slipping out

It happens time and time again that the tip slips out of the screw head when screwdriving, sometimes damaging valuable surfaces or even causing injury. The tips of the Wera Lasertip screwdrivers are microscopically roughened by means of a laser. This rough surface literally "bites" itself firmly into the screw head. Slipping out becomes a thing of the past.
