

Remote Relay Output Type G 8830 1143

- Small sized single relay output
- Load: 13 A/250 VAC
- Withstands 130A inrush current
- Powered via Dupline®
- Address coding by GAP 1605

Product Description

The Dupline® decentral receiver has a built-in SPST relay for control of a load of up to 13 A/250 VAC. The module is especially designed for the use in building automation applications where it allows a

flexible installation concept featuring a separate power and signal (control) bus. The compact size of the module makes it possible to fit it in a junction box or directly behind a power outlet.

Mode of Operation

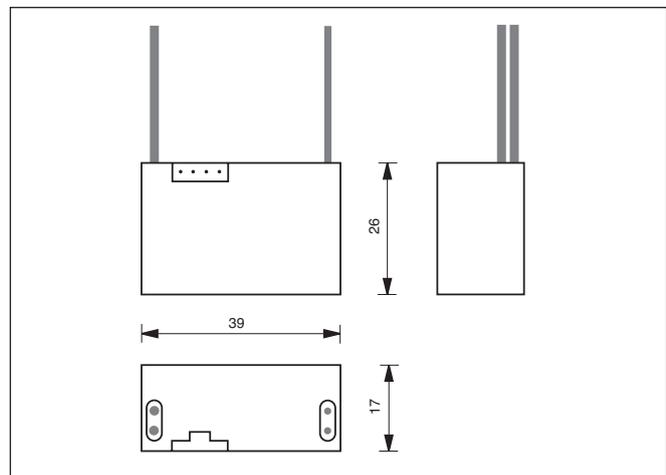

The output address and fail-polarity may be coded by means of the code programmer GAP 1605, with GAP-THP-CAB cable.

Upon loss of Dupline[®] carrier the output goes to the predefined fail-polarity.
