Product Change Notification

Title: PCN #2023010 TDK-Lambda Americas Inc. PXD30W & PXD60 case tooling change

The case tool for the PXD30W series and PXD60 series of DC-DC converters is being replaced as part of the normal manufacturing process. To optimize that manufacturing process we have adjusted the bend radii very slightly, making it visually less rounded. There are no changes to the overall product dimensions, price, form, fit or function. Safety certifications are not impacted.

Current case style

New case style

Current radius shape

New radius shape
