

Protected Connections for Durable Applications

Prepare for the worst-case scenario in the field with extra protection on important device connections. With precise and sturdy pin contacts and water- and dirt-resistant seals, Bulgin's line of circular automation connectors and cable assemblies provide design engineers with the best components to withstand chemical, thermal, and electrical stresses. Our line of connectors also resists the long-term effects of corrosion and mechanical vibration. Electronic designs intended for use in harsh environments can rely on secure connections that ensure long-time product safety and durability. Through our innovative interconnect products, we make it easy to keep any application protected.

Applications

- Industrial Automation
- Material Handling
- Machine Building
- Construction
- Marine
- Agriculture

7/8" Right-Angled

Circular Automation Connectors

- Available in 3, 4 & 5 Contacts
- Male (plug) or female (socket) housing
- Cable entry: 6 - 12mm
- Mates with Flex Body and Panel Mount

7/8" Flex Body

Circular Automation Connectors

- Available in 3, 4 & 5 contacts
- Male (plug) or female (socket) housing
- Cable entry: 6 - 12mm
- Mates with Right angled and Panel Mount

7/8" Front Panel Mounting

Circular Automation Connectors

- Available in 3, 4 & 5 contacts
- Male (plug) or female (socket) housing
- Mates with Right Angled and Flex Body
- Also available with Flying Leads

7/8" Flex Body

Cable Assemblies

- Available in 3, 4 & 5 contacts
- Male (plug) or female (socket) housing
- Available in 1m, 2m & 5m cable
- Mates with Right Angled and Panel Mount

7/8" Right-Angled

Cable Assemblies

- Available in 3, 4 & 5 contacts
- Male (plug) or female (socket) housing
- Plug or socket contacts
- Available in 1m, 2m & 5m cable
- Mates with Flex Body and Panel Mount
