Scalable Predictive Maintenance Solutions

Identify equipment problems and increase productivity by monitoring the health of motors, fans, pumps, and similar equipment. This kit provides a comprehensive monitoring solution, ensuring you get fast and powerful insights, key to preventing downtime or damage to critical assets. Solve operational challenges by monitoring pressurized systems, material levels, environmental conditions, and vibrational characteristics for the health of machinery that keeps your process working smoothly. These kits allow you to customize and scale toward the application and requirements that are most important to your bottom line.

- Products with proven wireless communication and integrated cellular or ethernet connectivity
- Default dashboards and alarms assist in data-driven decisions and solutions
- Wireless battery-powered sensor nodes for convenient installation
- Durable IP-rated sensors and gateways

Kit includes:

Wireless Gateway

Prepaid Banner Cloud Data Services

Banner Cloud ID™ Kit Series

Scale Your IIoT System with Banner

Kit Features:

- Connect a total of 40 sensor nodes for your specific application needs
- Preconfigured gateway provides time-saving direct-to-cloud functionality
- Wireless gateway options rated for indoor and outdoor applications
- Proven secure and reliable communications between sensors and the gateway
- 900 MHz or 2.4GHz ISM radio for long range communication with wireless sensor nodes
- On-board display for wireless sensor network commissioning and configuring device for ethernet or optional cellular connectivity

Designed to get up to speed quickly and scale with ease

The Banner Cloud ID™ Kits can deliver value in minutes with a simple curated setup and commissioning process. Choose from a family of industrial grade sensor nodes that are compatible with these kits and adapt the system for the specific requirements of the application or facility.

Banner Cloud ID™ Series

Designed to enable owners of assets and processes to obtain actionable insights that will solve industrial challenges delivered in a robust and easily deployable solution. From high-grade sensing hardware and gateways, to trusted network connectivity and intuitive software, the Banner Cloud ID™ Kit Series provides the entire stack of technologies needed to evaluate the Industrial Internet of Things (IIoT) within an enterprise.

DXM1200 Wireless Gateway

Banner's wireless gateway is an industrial wireless device that facilitates Industrial Internet of Things (IIoT) applications. As a communications gateway, it offers seamless connectivity by hosting a robust ISM radio network for local wireless devices used to acquire and transmit data from assets within the industrial environment. The intuitive on-board display is used to bind the nodes to the wireless network and the device arrives preconfigured for ethernet communication to Banner Cloud Data Services.

- ISM local radio network in 900 MHz or 2.4 GHz frequency band
- Equipped with IP67-rated housing for use in challenging environments
- DC Power Supply included within Banner Cloud ID™ Kit
- Embedded cellular device provides optional connection to Verizon, AT&T, or multiple carriers for international regions
- External radio and internal cellular antennas ensure reliable data transmission in all conditions
- Use default Ethernet connection or enable Cellular Data Services in minutes

Sensor Nodes to Customize your Banner Cloud ID™ Kit

Use the simple binding process to join up to 40 sensor nodes per gateway that monitor tank level, ambient temperature and humidity, the health of rotating machines and pressurized systems.

Radio Frequency of compatible sensors must match the radio frequency of the DXM1200 or DXM700 Gateway Controller (or some other designator).

Banner Engineering has hundreds of sensor solutions to meet your needs. Please visit BannerEngineering.com to discover the right solution for your specialized applications.

All-in-One Vibration Sensor Node

Vibration and temperature sensors that monitor the health and performance of motors, pumps, and similar equipment with rotating motion; mounting kits with magnetic and non-magnetic brackets are available

All-in-One Temperature and Humidity Sensor Node

Temperature and humidity wireless node monitors environmental conditions in a variety of applications, such as refrigerators or chillers, warehouses, cleanrooms, incubators, storage rooms, and distribution centers

Radio Frequency	Measurement Range	Inputs	Models
900 MHz ISM Band	–40 to +85 °C (–40 to +185 °F) 0 to 100% Relative Humidity	Temperature and relative humidity (%)	DX80N9Q45THA
2.4 GHz ISM Band			DX80N2Q45THA

All-in-One Temperature Probe Sensor Node

Thermistor nodes measure temperature in key areas or processes like air- and liquid- handling applications

Radio Frequency	Measurement Range	Inputs	Models
900 MHz ISM Band	–20 to +105 °C (–4 to +221 °F)	Temperature	DX80N9Q45TA

	±20 inches of water column		QM42-DPS20-1Q

All-in-One Current Sensor Node
Wireless node uses a current transformer to measure current draw, helping to reveal issues with critical motor performance

Radio Frequency	Measurement Range	Inputs	Models
900 MHz ISM Band	0-20 or 0-150 Amps	Amperage (Two Current Transformers Included)	DX80N9Q45CT
2.4 GHz ISM Band	0-20 or 0-150 Amps		DX80N2Q45CT

All models include a battery of respective size. To order an integrated battery model without the battery, add a NB to the model number.
