

**To:** Littelfuse Sales, Sales Support & Valued Customers

**From:** Littelfuse Product Management – Industrial Business Unit

**Subject:** LFPCN\_PG0176 - Change in labelling process for L25S series products.

**Document Number:** LFPCN\_PG0176

**Date:** 30<sup>th</sup> November 2023

Dear Valued customer:

Littelfuse would like to inform you that we have implemented a change to our L25S Series labelling process for 35A to 60A range (Part Numbers per below table). We are upgrading from ink print on body to paper label on body. Paper labelling is already implemented in several of our products. This process change offers improved labelling / marking quality and improves productivity. Additionally, with this change we have updated voltage rating marking in the new paper label to reflect the product electrical characteristics see below picture.

There is no change to fit, form or function of the actual product.

Date of implementation: 23<sup>rd</sup> November 2023

Part Numbers affected	Old label	New label
L25S035.T L25S040.T L25S045.T L25S050.T L25S060.T		

More pictures  
of new label

If you have any questions, or need additional information please contact your Littelfuse representative.

Thank you for your continued business.

Sincerely,

**Prashant Kulkarni**
