Focused on optimum security

The innovative Eazeo digital color and black and white Cameras deliver superb picture quality thanks to excellent light sensitivity and enhanced color, sharpness and contrast. They are the perfect solution for optimizing identification and recognition in security monitoring.

For indoor applications there is a choice of cameras with integrated lens, integrated varifocal lens and minidome. For outdoor use or aiming at a doorway where light levels may vary, cameras with CS-mount and varifocal DC-iris lenses are available. Varifocal lenses allow the field of view to be adjusted on-site.

These cameras also feature advanced functions like video motion detection (with selectable area and sensitivity) and adjustable field of view. They have automatic backlight and cable length compensation. Connections are made using the system cables supplied. Eazeo cameras are backed by a three-year warranty and an advanced replacement program. A helpdesk is available for your assistance.
