SVHCs in Articles and Packaging

On 28th October 2008 the European Chemicals Agency (ECHA) based in Finland, issued details around legal obligations that companies may have resulting from the inclusion of substances on the so called “Candidate List”. These obligations are not only linked to the listed substances on their own or in preparations but also to their presence in articles.

Suppliers of articles which contain substances on the Candidate List in a concentration of >0.1% of the weight of the total article must inform their customers of the name of the substance and provide appropriate safe use data.

In general, packaging is regarded as a separate article to the item it contains. For example, the sealed bag a semiconductor is supplied in and, if included, a humidity indicator card should be considered separately. Likewise, anything to protect the semiconductor, such as a foam insert, is a separate article. The 0.1% threshold would apply to each individually.

Taking into account the above and the example used; an article’s packaging would not need to be mentioned in relation to the article itself but would need to be mentioned separately, via the safety data.

Please refer to the following data sheet for details of any SVHC contained in the packaging of this product.
Fairchild Semiconductor’s Statement Regarding the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH)

In accordance with Article 33 of REACH Fairchild is obligated to inform recipients of articles that contain any of the chemicals on the Substance of Very High Concern (SVHC) candidate list above a 0.1% concentration (by weight per article).

We hereby declare that products manufactured and marketed by Fairchild Semiconductor do not contain substances on the REACH SVHC candidate list, in the table below in concentrations greater than 0.1% by weight per article. However, humidity indicator cards placed in dry pack bags of moisture sensitive products may contain 5% Cobalt dichloride. Also, tube-style rails that product is stored and shipped in may contain phthalates in the PVC tube.

REACH Declaration
Providing for limitations below, Fairchild Semiconductor certifies that the information provided in this document is correct as of the date indicated on this page.
Fairchild has implemented systems to ensure our products are compliant to environmental regulations and laws worldwide. However, not all materials in Fairchild’s products may have been independently verified regarding substance content. In the event of any issues arising from information in this document, the warranty section of Fairchild’s standard terms and conditions of sale shall apply, unless alternate contracts have been agreed upon in writing by both parties.
1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND THE COMPANY/UNDERTAKING

Product information

Commercial Product Name : Reversible Humidity Indicator III
Company : Süd-Chemie AG
Business Unit Performance Packaging
Ostenriederstrasse 15
85368 Moosburg
Telephone : +49876182765
Telefax : +49876182755
Contact Point : BPE +49 8761/82-765
Emergency telephone number : +49 (0)613284463 only for working place emergency (contact only in german or english)

2. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical nature : cobalt dichloride on cardboard
Usage : Indicator for air humidity

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

3. HAZARDS IDENTIFICATION

none under normal use

4. FIRST AID MEASURES

General advice : none
Eye contact : Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes.
Skin contact : Wash off with soap and plenty of water.
Inhalation : n.a.
Ingestion : Rinse mouth.
Notes to physician
Treatment : none

5. FIRE-FIGHTING MEASURES

Suitable extinguishing media : Use extinguishing measures appropriate to the environment.
Extinguishing media which must not be used for safety reasons: none

6. ACCIDENTAL RELEASE MEASURES

Environmental precautions: Do not flush into surface water or sanitary sewer system.
Methods for cleaning up: Take up contaminated material by mechanical means, load into clean containers, and dispose of in accordance with legal regulations.

7. HANDLING AND STORAGE

Handling
Safe handling advice: No special precautions required.

Storage
Requirements for storage areas and containers: Keep in a dry place.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Components with workplace control parameters

Personal protective equipment
Respiratory protection: n.a.
Hand protection: Chemical-resistant protective gloves according to EN 374, EN 388, EN 420
Eye protection: n.a.
Skin and body protection: Not required
Hygiene measures: Wash off with warm water and soap.
Protective measures: Prophylactic use of protective ointment (barrier cream) is recommended.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance
Form: Plates
Colour: pink to blue
Odour: none

Other data
Water solubility: partly soluble, max. 600 ppm CoCl₂ can be leached out.

pH: 4,5 - 6
10. STABILITY AND REACTIVITY

Hazardous reactions (Conditions to avoid) : hygroscopic

Hazardous reactions (Materials to avoid) : alkali metals

Information about decomposition : No decomposition if stored and applied as directed.

11. TOXICOLOGICAL INFORMATION

Acute toxicity
Acute oral toxicity : LD50 rat
Dose: 766 mg/kg
(cobalt(II)chloride-hexahydrate)

irritation, Sensitization, Other data Toxicology
Sensitization : May cause sensitization of susceptible persons by skin contact.

Repeated dose toxicity : no data available

12. ECOLOGICAL INFORMATION

Decomposition : not readily biodegradable.

Ecotoxicity effects
Ecotoxicity : no data available

Additional information about ecology
Water contaminating class : Heavy metals should not be released into the environment.
(Selbsteinstufung nach VwVwS-Konzept)
WGK 1 slightly water endangering

13. DISPOSAL CONSIDERATIONS

Product : Dispose as special waste Can be landfilled or incinerated, when in compliance with the Environmental Protection (Duty of Care) Regulations 1991.
14. TRANSPORT INFORMATION

Land transport : Not classified as dangerous in the meaning of transport regulations.

Sea transport : Not classified as dangerous in the meaning of transport regulations.

Air transport : Not classified as dangerous in the meaning of transport regulations.

15. REGULATORY INFORMATION

General advice : The product does not need to be labelled in accordance with EC directives or respective national laws.

Hazardous components which must be listed on the label:
- Not applicable

Other data:
Contains: COBALT DICHLORIDE May produce an allergic reaction.

Other information : Handle in accordance with good industrial hygiene and safety practice.

Notification status: preparation

16. OTHER INFORMATION

Relevant R-Phrases acc. Chapter 2 and 3 : R22 - Harmful if swallowed. R42/43 - May cause sensitization by inhalation and skin contact. R49 - May cause cancer by inhalation.
R50/53 - Very toxic to aquatic organisms, may cause long-term effects in the aquatic environment.

<tr>
<td><strong>EINECS number</strong></td>
<td>204-211-0</td>
</tr>
<tr>
<td><strong>What is DEHP?</strong></td>
<td>DEHP is a substance that is used as a plasticiser to make PVC plastic soft and flexible. It is a colourless and odourless organic chemical.</td>
</tr>
<tr>
<td><strong>Where is it used?</strong></td>
<td>DEHP is used in a wide range of soft PVC products ranging from lifesaving medical devices such as medical tubing and blood bags, to footwear, electrical cables, packaging, tarpaulins for lorries, stationery and roofing.</td>
</tr>
</tbody>
</table>
| **Why is it used?** | Plasticisers are essential to make PVC flexible. PVC is rigid by nature but plasticisers give it similar properties to rubber: it becomes flexible and expandable, whilst retaining its shape.  
There are many different plasticisers available but a manufacturer of PVC will make what they believe to be the best choice for their particular products.  
DEHP is widely used because for many years it has provided particularly good processing and end product performance which in many cases cannot be matched by alternatives. |
| **Is it safe?** | The use of DEHP has been carefully considered by EU scientists and it is already well regulated by European legislation relating to toys and childcare articles, cosmetics, food contact materials and medical devices.  
Indeed, DEHP has been used for more than 50 years without a single known case of anyone having been harmed as a result.  
DEHP is not classified as a human carcinogen or mutagen and it does not accumulate in humans or in the environment |
| **Why is DEHP on the REACH Candidate List?** | Substances are placed on the Candidate List for authorisation based on their potential to cause harm (their hazard) rather than on any actual risk they may pose. In the case of DEHP, it has been put on the candidate list due to reproductive effects that have been seen during tests on rodents. However, as these effects are only seen at levels much higher than humans are usually exposed to, there is no danger from its use in most everyday PVC products. |
