

**Rx Series Round nose plier, RX 7590 ergo®**

These pliers are made from high performance tools steel with specially forged box joint with polished surface, extra long contact surfaces made possible by a special manufacturing technique. The pliers are toughness hardened to 45-48 HRC. Handles in two component synthetic material and come with return spring. This plier has 20 mm round smooth jaws that are tapered and precision ground to a fine point.
