

Technical Information

Thermophant T TTR31, TTR35

Temperature switch for safe measurement,
monitoring and control of process temperatures

Applications

Temperature switch for monitoring, display and control of process temperatures in the range of -50 to 200 °C (-58 to 392 °F):

- Thermophant T TTR31 - with threaded connections or compression fitting
- Thermophant T TTR35 - for hygienic applications

Applications:

- Versions for use in hygienic applications
- Electronic versions
 - one PNP switch output
 - two PNP switch outputs
 - 2x PNP switch outputs or one PNP switch output and 4 to 20 mA output (active)

Your benefits

The compact temperature switch impresses with state-of-the-art technology:

- Integrated switching electronics for decentralized and cost-effective monitoring and control of processes
- High reproducibility and long-term stability
- Function check and information on site via LEDs and digital display
- Platinum temperature sensor with long-term stability (Pt100, Cl. A as per IEC 60751)
- High accuracy over the entire ambient temperature range and short response time
- Operation and visualization with PC and FieldCare configuration software
- Top housing section can be rotated 310°
- DESINA-compliant
- 3-A mark and EHEDG certification for TTR35

Function and system design

Measuring principle

Electronic recording and conversion of input signals in industrial temperature measurement. A platinum sensor located at the measuring tip changes its resistance value depending on the temperature. This resistance value is recorded electronically. The relationship between resistance and temperature is defined in the international standard IEC 60751.

Measuring system

Overview

Thermophant product family	TTR31	TTR35
	 <p style="text-align: right; font-size: small;">A0005276</p>	 <p style="text-align: right; font-size: small;">A0023194</p>
Sensor unit	Pt100	Pt100
Field of application	Measurement, monitoring and control of process temperatures.	Measurement, monitoring and control of process temperatures in hygienic processes.
Process connection	<ul style="list-style-type: none"> ▪ Compression fitting (sensor length ≥ 100 mm (3.94 in)) ▪ Thread: <ul style="list-style-type: none"> ▪ G½" and G¾" ▪ ANSI NPT¼" and NPT½" 	Hygiene: <ul style="list-style-type: none"> ▪ Conical metal-metal G½" ▪ Clamp 1" - 1½", 2" ▪ Varivent F, N ▪ DIN 11851 ▪ APV Inline
Measuring range	-50 to 150 °C (-58 to 302 °F) (-50 to 200 °C (-58 to 392 °F) with extension neck)	-50 to 150 °C (-58 to 302 °F) (-50 to 200 °C (-58 to 392 °F) with extension neck) in hygienic processes

DC voltage version (DC)

PNP switch output of electronics.

Power supply e.g. with a power supply unit.

Preferably in connection with programmable logic controllers (PLC) or for controlling a relay.

A0043601

- A 1x PNP switch output
 B 2x PNP switch output
 C PNP switch output with additional analog output 4 to 20 mA (active)
 1 Transmitter power supply unit, e.g. RNB130
 2 Load (e.g. programmable logic controller, process control system, relay)
 3 Process indicator, e.g. RIA452 or recorder, e.g. Ecograph T (at 4 to 20 mA analog output)

1 "Easy Analog RNB130" transmitter power supply

Primary switched-mode power supply for sensors. Space-saving DIN rail mounting as per IEC 60715. Wide-range input: 100 to 240 V_{AC} nominal voltage; output: 24 V_{DC}, max. 30 V in the event of a fault;

Nominal current: 1.5 A. Connection to single-phase alternating current networks or to two phase conductors of three-phase supply networks.

2 Process Indicator RIA452

If you would like to read off the instantaneous temperature value not only locally, but also directly from a control room or in the PC network, for example, the RIA452 process indicator is one possible solution: digital process indicator in a 96 x 96 mm (3.78 x 3.78 in) panel-mounted housing for monitoring and displaying analog measured values with pump control and batch functions. Multicolored 7-digit 14-segment LC display with bargraph representation. Configuration and measured value visualization via RS232 interface and PC configuration software.

3 Universal Graphic Data Manager Ecograph T

If you would not only like to read off the instantaneous temperature value, but also record, analyze and display it directly in a control room or in the PC network, for example, then the following options are available:

Universal Graphic Data Manager Ecograph T in a 144 x 144 mm (5.67 x 5.67 in) panel-mounted housing for the electronic capture, display, recording, analysis, remote transmission and archiving of analog and digital input signals. Multichannel data recording system with multicolored TFT display (145 mm (5.7 in) screen size), galvanically isolated universal inputs (U, I, TC, RTD, pulse, frequency),

digital inputs, transmitter power supply, limit relays, communication interfaces (USB, Ethernet, optionally RS232/485), 128 MB internal memory, external SD card and USB stick. The Field Data Manager (FDM) software supports data analysis at the PC, the device can be configured with FieldCare or the integrated Web server.

Input

Measured variable Temperature (temperature-linear transmission behavior)

Measuring range	Designation	Measuring range limits	Min. Span
	Pt100 as per IEC 60751	-50 to +150 °C (-58 to +302 °F) -50 to +200 °C (-58 to +392 °F) with extension neck	20 K (36 °F)
Sensor current: ≤ 0.6 mA			

Output

Output signal DC voltage version (short-circuit proof version):

- 1x PNP switch output
- 2x PNP switch outputs
- 1x PNP switch output or one PNP switch output and 4 to 20 mA output, active

Signal on alarm

- Analog output: ≤ 3.6 mA or ≥ 21.0 mA (if setting is ≥ 21.0 mA, output is ≥ 21.5 mA)
- Switch outputs: in safe state (switch open)

Load Max. $(V_{\text{power supply}} - 6.5 \text{ V}) / 0.022 \text{ A}$ (current output)

Range of adjustment	Switch output	Switch point (SP) and switchback point (RSP) in 0.1 °C (0.18 °F) increments. Minimum difference between SP and RSP: 0.5 °C (0.8 °F)
	Analog output (if available)	Lower range value (LRV) and upper range value (URV) can be configured as required within the sensor range Min. Span 20 K (36 °F)
	Damping	Can be configured as required: 0 to 40 s in increments of 0.1 s
	Unit	°C, °F, K

Switching capacity DC voltage version:

Switch status ON	I _a ≤ 250 mA
Switch status OFF	I _a ≤ 1 mA
Switching cycles	> 10,000,000
Voltage drop PNP	≤ 2 V
Overload protection	Switching current checked automatically; switched off in event of overcurrent, switching current checked again every 0.5 s; max. capacitive load: 14 µF for max. supply voltage (without resistive load); periodic disconnection from a protective circuit in event of overcurrent (f = 2 Hz) and "Warning" displayed

Inductive load To prevent electrical interference, only operate an inductive load (relays, contactors, solenoid valves) with a direct protective circuit (free-wheeling diode or capacitor).

Power supply

Electrical connection

Plug connector

i TTR35: According to the 3-A Sanitary Standard and EHEDG electrical connecting cables must be smooth, corrosion-resistant and easy to clean.

A M12x1 connector
B Valve connector M16x1.5 or NPT 1/2"

Device connection

DC voltage version with M12x1 connector

1 Thermophant T with M12x1 connector

Item no.	Output setting
A1	1x PNP switch output
A2	2x PNP switch output R1 and Rx (R2)
A2'	2x PNP switch output R1 and Rx (diagnostics/NC contact with "DESINA" setting)
A3	1x PNP switch output and 1x analog output (4 to 20 mA)
A4	1x analog output (4 to 20 mA) and 1x PNP switch output Rx (R2)
A4'	1x analog output (4 to 20 mA) and 1x PNP switch output Rx (diagnostics/NC contact with "DESINA" setting)

DC voltage version with M16x1.5 valve connector or NPT 1/2"

A0035798

Item no.	Output setting
B	1x PNP switch output

Supply voltage

DC voltage version: 12 to 30 V_{DC} (reverse polarity protection)

Behavior in case of overvoltage (> 30 V)

- The device works continuously up to 34 V_{DC} without any damage
- No damage in the event of transient overvoltage up to 1 kV (according to EN 61000-4-5)
- If the supply voltage is exceeded, the specified characteristics are no longer guaranteed

Behavior in the event of undervoltage

If the supply voltage falls below the minimum value, the device switches off in a defined manner (status is the same as for not supplied with power = switch open).

 The device may be powered only by a power supply unit that operates using a limited energy circuit in accordance with UL/EN/IEC 61010-1, Section 9.4 and the requirements in Table 18.

Current consumption

without load < 60 mA with reverse polarity protection

Performance characteristics

The percentages in the "Performance characteristics" section refer to the nominal value of the sensor.

Reference operating conditions

As per DIN IEC 60770 or DIN IEC 61003

T = 25 °C (77 °F)

- Relative humidity 45 to 75%
- Ambient air pressure 860 to 1 060 kPa (124 to 153 psi), using water as the test medium
- Supply voltage U = 24 V_{DC}

Maximum measured error switch point and display

Electronics

0.2 K (0.36 °F)

Sensor

- Tolerance class A as per IEC 60751, -50 to +200 °C (-58 to +392 °F)
- Maximum measured error in °C = ± 0.15 + 0.002 · |T|

|T| = Process temperature in °C without taking the sign into account.

Total error

Total error = electronics error + sensor error, e.g. for process temperatures:

- -50 to +75 °C (-58 to +167 °F) ≤ 0.5 K (0.9 °F)
- +75 to +200 °C (+167 to +392 °F) ≤ 0.75 K (1.35 °F)

Switch point non-reproducibility

0.1 K (0.18 °F) as per EN 61298-2 (without ambient temperature effect)

Long-term drift

≤ 0.1 K (0.18 °F) per year under reference conditions

Sensor response time Measured in accordance with IEC 60751 with 0.4 m/s (1.3 ft/s) in flowing water 100 ms

t_{50}	t_{90}
< 1.0 s	< 2.0 s

Long-term reliability Mean time between failure (MTBF) > 100 years
(calculated according to the "British Telecom Handbook of Reliability Data No. 5")

Influence of ambient temperature

- Switch output and display: ≤ 30 ppm/K
- Analog output: ≤ 50 ppm/K + influence of switch output and display

Switch output response time 100 ms

Analog output

Maximum measured error	Switch point and display deviation + 0.1%
Rise time t_{90}	≤ 200 ms
Settling time t_{99}	≤ 500 ms

Installation

General installation instructions

- Any orientation
- Top housing section can be rotated 310°
- No restrictions. However, self-draining in the process must be guaranteed. If there is an opening to detect leaks at the process connection, this opening must be at the lowest possible point.

A0011644

2 Installation options for temperature monitoring in pipelines

- 1 Hexagonal screw of sensor module
- 2 TTR31
- 3 TTR35 for use in hygienic processes

Installation instructions

A0011673-EN

3 Detailed installation instructions for hygiene-compliant installation

A Milk pipe connection according to DIN 11851 (PL, PG, PH connection), only in conjunction with EHEDG-certified and self-centering sealing ring

B Varivent® and APV-Inline (LB, LL, HL connection)

C Clamp as per ISO 2852 (DB, DL connection), EHEDG-certified only in conjunction with seal as per EHEDG position paper

i The requirements of the EHEDG and the 3-A Sanitary Standard must be adhered to.

Installation instruction EHEDG/cleanability: $Lt \leq (Dt-dt)$

Installation instruction 3-A/cleanability: $Lt \leq 2(Dt-dt)$

In the case of weld-in connections, exercise the necessary degree of care when performing the welding work on the process side:

1. Use suitable welding material.
2. Flush-weld or weld with welding radius ≥ 3.2 mm (0.13 in).
3. Avoid crevices, folds or gaps.
4. Ensure the surface is honed and polished, $Ra \leq 0.76$ μm (30 μin).

Pay attention to the following when installing the thermometer to ensure that the cleanability is not affected:

1. The installed sensor is suitable for CIP (cleaning in place). Cleaning is carried out in combination with tubing/piping or tank/vessel. In the case of internal tank fixtures using process connection nozzles, it is important to ensure that the cleaning assembly sprays this area directly so that it is cleaned properly.
2. The Varivent® connections enable flush-mounted installation.

NOTICE

The following action must be taken if a sealing ring (O-ring) or seal fails:

- ▶ The thermometer must be removed.
- ▶ The thread and the O-ring joint/sealing surface must be cleaned.
- ▶ The sealing ring or seal must be replaced.
- ▶ CIP must be performed after installation.

Environment

Ambient temperature range -40 to $+85$ °C (-40 to $+185$ °F)

Storage temperature -40 to $+85$ °C (-40 to $+185$ °F)

Operating altitude Up to 4 000 m (13 123.36 ft) above sea level

Degree of protection	IP65	M16 x 1.5 or NPT ½", valve connector
	IP66	M12 x 1 connector

Shock resistance 50 g as per DIN IEC 68-2-27 (11 ms)

Vibration resistance

- 20 g as per DIN IEC 68-2-6 (10-2000 Hz)
- 4 g as per marine approval

Electromagnetic compatibility (EMC) CE conformity
 Electromagnetic compatibility in accordance with all the relevant requirements of the IEC/EN 61326 series and NAMUR Recommendation EMC (NE21). For details refer to the EU Declaration of Conformity.
 Maximum measured error <1% of measuring range.
 Interference immunity as per IEC/EN 61326 series, industrial requirements.
 Interference emission to IEC/EN 61326 - series, electrical equipment Class B.

Electrical safety

- Protection class III
- Overvoltage category II
- Pollution level 2

Process

Process temperature range -50 to +150 °C (-58 to +302 °F) (or -50 to +200 °C (-58 to 392 °F) with extension neck).

Restrictions depending on process connection and ambient temperature:

- No restriction with compression fitting (see Accessories, order no. 51004751, 51004753) and extension neck length min. 20 mm (0.79 in)
- with process connection:

Max. ambient temperature	Max. process temperature
up to 25 °C (77 °F)	No restrictions
up to 40 °C (104 °F)	135 °C (275 °F)
up to 60 °C (140 °F)	120 °C (248 °F)
up to 85 °C (185 °F)	100 °C (212 °F)

Process pressure range Maximum permitted process pressure depending on the insertion length

4 Maximum permitted process pressure

L Insertion length
 p Process pressure

The diagram takes into consideration not only the overpressure but also the compressive load caused by flow, wherein a safety factor of 1.9 has been applied for operation with flow. Due to the increased bending stress caused by flow, the maximum permitted static operating pressure is lower in the case of longer insertion lengths.

This calculation is based on the maximum permitted flow velocity for the respective insertion length (see diagram below).

i The maximum process pressure for the conical metal-metal process connection for hygienic processes (MB option) for the device is 1.6 MPa = 16 bar (232 psi).

Permitted flow velocity depending on the insertion length

5 Permitted flow velocity

A Water
 B Air
 L Insertion length, during flow
 v Flow velocity

The permitted flow velocity is the minimum defined by the resonance velocity (resonance distance 80%) and stress or buckling caused by flow, which would lead to failure of the thermometer tube or to the safety factor (1.9) being exceeded. The calculation was performed for the specified limit operating conditions of 200 °C (392 °F) and ≤ 100 bar (1 450 psi) process pressure.

Mechanical construction

Design, dimensions

A0023233

All dimensions in mm (in)

- 1 Temperature switch with extension neck and M12x1 connector according to IEC 60947-5-2
 - 2 Temperature switch (hygiene version) with extension neck and M12x1 connector according to IEC 60947-5-2
 - 3 Valve connector M16x1.5 or NPT½" as per DIN 43650A/ISO 4400

1) Varivent® process connections are suitable for installation in VARINLINE® housing connection flanges.

 The VARINLINE® housing connection flange is suitable for welding into the conical or torispherical head in tanks or vessels with a small diameter (≤ 1.6 m (5.25 ft)) and up to a wall thickness of 8 mm (0.31 in). The Varivent type F cannot be used for installations in pipes in combination with the VARINLINE housing connection flange.

Weight approx. 300 g (10.58 oz), depends on process connection and sensor length

Materials

- Process connection AISI 316L
Surfaces in contact with the process in hygienic version with surface quality $R_a \leq 0.76 \mu\text{m}$ (30 μin)
- Coupling nut AISI 304
- AISI 316L housing, with surface quality $R_a \leq 0.76 \mu\text{m}$ (30 μin)
O-ring between housing and sensor module: EPDM
- Electrical connection
 - M12 connector, exterior AISI 316L, interior polyamide (PA)
 - Valve connector, polyamide (PA)
 - M12 connector, exterior 316L
 - Cable sheath polyurethane (PUR)
 - O-ring between electrical connection and housing: FKM
- Display, polycarbonate PC-FR (Lexan®)
Seal between display and housing: SEBS THERMOPLAST K®
Keys, polycarbonate PC-FR (Lexan®)

Operability

Operating concept

Position of the display and operating elements

To prevent damage to the keys, do not operate them with a pointed object!

Local operation

Menu-guided operation using operating keys.

Function group	Operating options
BASE (basic functions)	Selection of unit: °C, °F, K
	Zero point, offset (automatic and manual)
	Damping display value, output signal: from 0 to 40 s (in 0.1 s increments), as required
	Display <ul style="list-style-type: none"> ■ Display measured value or set switch point ■ Rotate display by 180° ■ Switch off display
	Behavior in accordance with DESINA (with 2 outputs only): The PIN assignment of the M12 connector is in accordance with DESINA guidelines (DESINA = distributed and standardized installation technology for machine tools and manufacturing systems)
OUT (configuration of 1st output) and OUT2 (configuration of 2nd output, only for corresponding electronics version)	Switch output function: <ul style="list-style-type: none"> ■ Hysteresis or window function ■ NC contact or NO contact (see the following diagram) ■ Analog output 4 to 20 mA
	Switch point: <ul style="list-style-type: none"> ■ Input value ■ Accept present value Switch point from 0.5 to 100% URL (in 0.1 % increments), as required
	Switchback point: <ul style="list-style-type: none"> ■ Input value ■ Accept present value Switchback point from 0.5 to 99.5% URL (in 0.1 % increments), as required
	Switch output delay: can be configured as required from 0 to 99 s (in 0.1 s increments)

Function group	Operating options
4-20 (configuration of analog output, only for corresponding electronic version)	Lower range value (LRV) and upper range value (URV) of analog output: <ul style="list-style-type: none"> ▪ Input value ▪ Accept present value Setting of failure current: choice of ≤ 3.6 mA / ≥ 2.1 mA / last current value
SERV (service functions)	Reset all settings to factory setting
	Preset locking code
	Locking
	Static revision counter, incremented each time the configuration is changed
	Display of last error to occur
	Simulation of switch output 1, switch output 2 and analog output
	Display of max. measured temperature value
	Display of min. measured temperature value

Functions of the switch point

- Hysteresis function:
The hysteresis function enables two-point control via a hysteresis. Depending on the temperature, the hysteresis can be set via the switch point SP and the switchback point RSP.
- Window function:
The window function allows a process window to be defined.
- NO contact or NC contact:
This switch function can be selected as required.
- Delay times for switch point SP and switchback point RSP can be configured in increments of 1 s. This makes it possible to filter out undesired temperature peaks of short duration or of high frequency

The graph shows a temperature curve T over time t. Two horizontal lines represent the switch point (SP) and the switchback point (RSP). A shaded area between SP and RSP indicates the hysteresis window. Below the graph, a switch output diagram shows four contacts: 1 (Window - NC), 2 (Hysteresis - NC), 3 (Window - NO), and 4 (Hysteresis - NO). The diagram shows the state of these contacts as the temperature crosses the SP and RSP thresholds.

8 Switch point functions

- A Hysteresis function
- B Window function
- 1 Window - NC contact
- 2 Hysteresis - NC contact
- 3 Window - NO contact
- SP Switch point
- RSP Switchback point

Remote operation with PC

Operation, visualization and maintenance with PC and PC configuration software ReadWIN 2000 or FieldCare.

A0008072

 9 Operation, visualization and maintenance with PC and configuration software

- 1 PC with ReadWin 2000 or FieldCare configuration software
- 2 Configuration kit TXU10-AA or FXA291 →  20
- 3 Temperature switch

In addition to the operating options listed in the previous "Local operation" section, further information regarding the Thermophant T is available via the ReadWin 2000 or FieldCare configuration software:

Function group	Description

	Software version

Certificates and approvals

CE mark The product meets the requirements of the harmonized European standards. As such, it complies with the legal specifications of the EC directives. The manufacturer confirms successful testing of the product by affixing to it the CE-mark.

Other standards and guidelines

- IEC 60529:
Degrees of protection provided by enclosures (IP code)
- IEC/EN 61010-1:
Protection Measures for Electrical Equipment for Measurement, Control, Regulation and Laboratory Procedures
- IEC/EN 61326 series:
Electromagnetic compatibility (EMC requirements)
- NAMUR:
International user association of automation technology in process industries (www.namur.de)
- NEMA:
United States National Electrical Manufacturers Association.

UL approval

More information under UL Product iq™, search for keyword "E225237")

Hygiene standard

- EHEDG certification, type EL CLASS I. EHEDG certified/tested process connections →  13
- 3-A Authorization No. 1144, 3-A Sanitary Standard 74-07. Listed process connections →  13
- FDA-compliant

Materials in contact with food/product (FCM)

The materials of the thermometer in contact with food/product (FCM) comply with the following European regulations:

- (EC) No. 1935/2004, Article 3, Paragraph 1, Articles 5 and 17 on materials and articles intended to come into contact with food.
- (EC) No. 2023/2006 on good manufacturing practice (GMP) for materials and articles intended to come into contact with food.
- (EC) No. 10/2011 on plastic materials and articles intended to come into contact with food.
- All surfaces in contact with the medium are free from materials derived from bovine animals or other livestock (ADI/TSE)

Material certification

The material certificate 3.1 (according to standard EN 10204) can be requested separately. The "short form" certificate includes a simplified declaration with no enclosures of documents related to the materials used in the construction of the single sensor and guarantees the traceability of the materials through the identification number of the thermometer. The data related to the origin of the materials can subsequently be requested by the client if necessary.

Ordering information

Detailed ordering information is available for your nearest sales organization www.addresses.endress.com or in the Product Configurator under www.endress.com :

1. Click Corporate
2. Select the country
3. Click Products
4. Select the product using the filters and search field
5. Open the product page

The Configuration button to the right of the product image opens the Product Configurator.

Product Configurator - the tool for individual product configuration

- Up-to-the-minute configuration data
- Depending on the device: Direct input of measuring point-specific information such as measuring range or operating language
- Automatic verification of exclusion criteria
- Automatic creation of the order code and its breakdown in PDF or Excel output format
- Ability to order directly in the Endress+Hauser Online Shop

Accessories

Device-specific accessories

Welding boss with sealing taper

- Collar welding boss movable with sealing taper, washer and pressure screw G $\frac{1}{2}$ "
- Material of parts in contact with the process: 316L, PEEK
- Max. process pressure 10 bar (145 psi)
- Order number with pressure screw 51004751
- Order number without pressure screw 51004752

A0020709-EN

10 Dimensions in mm (in)

- 1 Pressure screw, 303/304
- 2 Washer, 303/304
- 3 Sealing taper, PEEK
- 4 Collar welding boss, 316L

Collar welding boss

- Collar welding boss movable with sealing taper and washer
- Material of parts in contact with the process: 316L, PEEK
- Max. process pressure 10 bar (145 psi)
- Order number without pressure screw: 51004752

A0020710

11 Dimensions in mm (in)

Compression fitting

- Movable clamping ring, various process connections
- Material of compression fitting and parts in contact with the process: 316L
- Order number: TA50-..... (depending on the process connection)

A0020174-EN

12 Dimensions in mm (in)

Version	F in mm (in)		L ~ in mm (in)	C in mm (in)	B in mm (in)	Clamping ring material	Max. process temperature	Max. process pressure
TA50	G½"	SW/AF 27	47 (1.85)	-	15 (0.6)	SS316 ¹⁾	800 °C (1 472 °F)	40 bar at 20 °C (580 psi at 68 °F)
						PTFE ²⁾	200 °C (392 °F)	5 bar at 20 °C (72.5 psi at 68 °F)
	G¾"	SW/AF 32	63 (2.48)	-	20 (0.8)	SS316 ¹⁾	800 °C (1 472 °F)	40 bar at 20 °C (580 psi at 68 °F)
						PTFE ²⁾	200 °C (392 °F)	5 bar at 20 °C (72.5 psi at 68 °F)
	G1"	SW/AF 41	65 (2.56)	-	25 (0.98)	SS316 ¹⁾	800 °C (1 472 °F)	40 bar at 20 °C (580 psi at 68 °F)
						PTFE ²⁾	200 °C (392 °F)	5 bar at 20 °C (72.5 psi at 68 °F)
	NPT½"	SW/AF 22	50 (1.97)	-	20 (0.8)	SS316 ¹⁾	800 °C (1 472 °F)	40 bar at 20 °C (580 psi at 68 °F)
R½"	SW/AF 22	52 (2.05)	-	20 (0.8)	PTFE ²⁾	200 °C (392 °F)	5 bar at 20 °C (72.5 psi at 68 °F)	
R¾"	SW/AF 27	52 (2.05)	-	20 (0.8)	PTFE ²⁾	200 °C (392 °F)	5 bar at 20 °C (72.5 psi at 68 °F)	

- 1) SS316 clamping ring: can only be used once. Once released the compression fitting cannot be repositioned on the thermowell. Fully adjustable immersion length on initial installation
- 2) PTFE/Elastosil® clamping ring: reusable; once loosened, the compression fitting can be moved up or down on the thermowell. Fully adjustable immersion length

Communication-specific accessories

Coupling; connecting cable

<ul style="list-style-type: none"> ▪ Coupling M12x1; straight ▪ Connection to M12x1 housing connector ▪ Materials: body PA, coupling nut CuZn, nickel-plated ▪ Degree of protection (connected): IP 67 ▪ Order number: 52006263 		A0035843

Configuration kit

- | |
|--|
| <ul style="list-style-type: none"> ■ Configuration kit for PC-programmable transmitters; Configuration software and interface cable for PC with USB port and 4-pin post connector
Order code: TXU10-AA ■ "Commubox FXA291" configuration kit with interface cable for PC with USB port. Intrinsically safe CDI interface (Endress+Hauser Common Data Interface) for transmitters with 4-pin post connector. Suitable configuration software is FieldCare for example.
Order code: FXA291 |
|--|

Configuration software

The ReadWin 2000 and FieldCare 'Device Setup' configuration programs can be downloaded free of charge directly from the Internet at the following addresses:

- www.produkte.endress.com/readwin
- www.produkte.endress.com/fieldcare

FieldCare 'Device Setup' can also be ordered from an Endress+Hauser sales office.

System components

- Easy Analog RNB130 power supply from Endress+Hauser with nominal output current $I_N = 1.5 \text{ A}$. For details, see Technical Information TI120R/09/en.
- Process indicator RIA452 from Endress+Hauser with transmitter power supply, max. output current $I = 250 \text{ mA}$. For details, see Technical Information TI113R/09/en.

Supplementary documentation

Technical Information

- Easy Analog RNB130: TI120R
- Process indicator RIA452: TI113R
- Universal Data Manager Ecograph T: TI01079R

Operating Instructions

- Thermophant T temperature switch TTR31, TTR35: BA00229R
- FieldCare configuration software: BA027S
