## Description

- Our Lives Preserved in Electronic Format

With many aspects of our daily lives becoming more and more digitalized, most of our important files and documents such as photos, music, films, letters and spreadsheets can now be found stored on our computers. It is needless to say that this is far more convenient and space efficient, having all files in one place for easy access minus the huge pile of

paper! However, if files are stored on a big bulky device such as a home computer then this can limit portability, and in all cases files can be left vulnerable to being lost if your computer crashes or is lost or stolen. Heaven forbid that a lifetime of precious photos and documents should disappear, never to be seen again!

### Transfer Files in a Flash!

The 'Fancy' Pen Drive USB from Hama provides the perfect portable solution for data storage and back-up with its sleek yet durable brushed aluminium design and compact size that allows it to be easily slipped into a pocket or bag for convenient transportation and use on the go. Transferring files back and forth from a computer or viewing files directly from the pen couldn't be easier thanks to a data transfer speed of up to 6Mb/s and compatibility with all terminal devices with a USB interface (Interface; crossing point between two systems; one distinguishes between a hardware and software interface.) and with Windows ME/2000/XP/Vista/7 and MacOS 9.x or higher operating systems. Simply plug the pen into the USB slot of your computer or

chosen device and drag and drop files to start the transfer. There's plenty of space to spare thanks to the fantastic 16GB capacity, meaning none of your files have to be left behind! Either remove the pen and insert into the USB slot of another USB compatible device in order to transfer and view files or store it somewhere safe as a back-up, data can be written and erased as many times as is required.
