

Our batteries, belonging to the following technologies:

- Rechargeable Ni-MH Button
- Rechargeable Ni-MH Cylindrical
- Rechargeable Lithium Prismatic (Polymer)
- Rechargeable Lithium Cylindrical
- Rechargeable Lithium Prismatic
- Rechargeable Lithium Button
- Primary Lithium Cylindrical
- Primary Lithium Button
- Primary Lithium Prismatic (VARTA CardPower)
- Primary Alkaline Manganese Cylindrical

are in line with RoHS (in accordance to EU Directive 2002/95/EC) requirements. They do not contain the hazardous substances Hg, Cd, Pb, Cr6+, PBBs and PBDEs as in RoHS, with Cd < 100 ppm, and the others <1000ppm (this includes assembled battery versions of these types).

Please refer to our Material Data Sheets or Material Safety Data Sheets as the supporting documents.

Note: Strictly speaking, the applicable regulation for battery is not the RoHS, but the Battery Directive (2006/66/EC). Requirements according to the WEEE Directive (2002/96/EC) are also covered by this.
