Subject: Label legend addition in SLC fuses

Document Number: LFPCN_PG0176

Date: Rev 02/07/24

We would like to inform there is a change on SLC fuse label, adding 170 VDC as shown on label image.

Previous label	New label
 The previous label for the SLC 30A fuse. It features the Littelfuse logo at the top, followed by 'CLASS G CURRENT LIMITING TIME-DELAY FUSE'. The main text reads 'SLC 30A' and '480V AC OR LESS'. On the left, there are UL and CSA certification marks. On the right, it says 'I.R. 100KA RMS SYM. Assembled In Mexico POWER-GARD Products Chicago, IL' and includes a RoHS symbol.	 The new label for the SLC 30A fuse, which is identical to the previous one but includes an additional specification. The text '480V AC / 170V DC' is added at the bottom of the label, enclosed in a blue rectangular box.

There is not impact on Fit, Form or Function.

Effective date: March 2024. This is a running change.

We appreciate your continued business and understanding in this matter. If you have any questions or require additional information, please don't hesitate to contact your dedicated Littelfuse representative.

Sincerely,

Zuleyma Davila
