TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

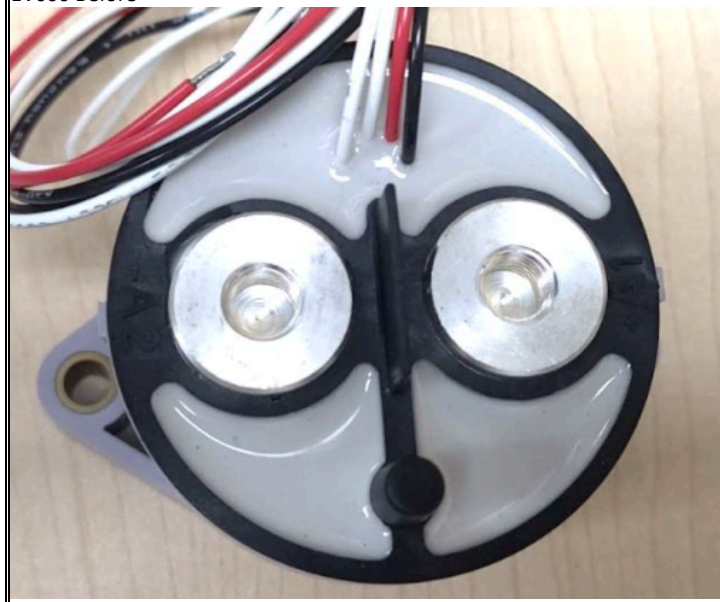

Product Description: (Text limited to 120 characters)

KILOVAC EV600 CONTACTORS

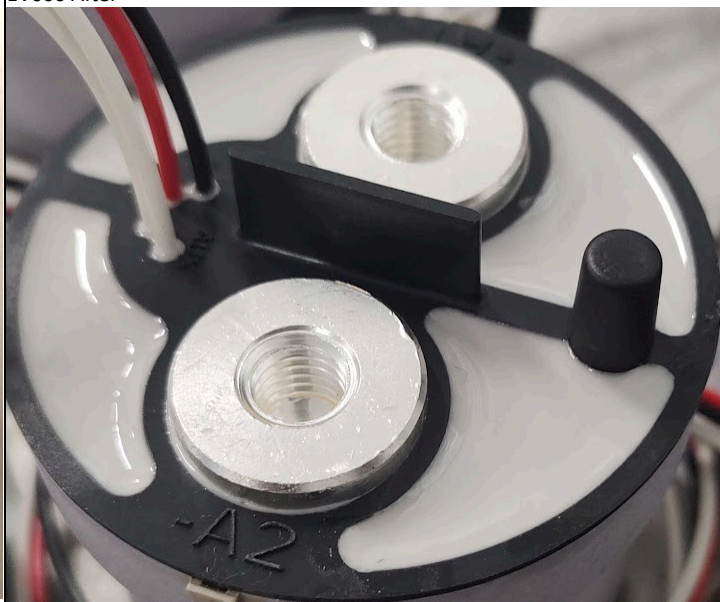

General Description of Changes

Dear customer, we hereby inform you about a change on the economizer circuit used on the EV600 contactors family. The change improves the PCBA making it more robust under overvoltage supplied to the economizer; in addition, we are incorporating a new Top Cap design for a better control on wires exit; in the same way the new top cap design will be suitable to reduce risk for insulation damage on the wires exit. Please be aware that the purchase order already placed to TE connectivity will have the updated economizer circuit, nevertheless, new top cap design will be incorporated for new PO's. Although change does affect the form of the product, the performance will not be impacted negatively. The new PCBA and Top Cap design, will be first article inspected and validated prior to any shipment.

EV600 Before

EV600 After

Reason for Changes:

TE Connectivity's (TE) in alignment with the operative advantage, is working to improve the quality and ability to supply the concerned products.
