TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

General Product Description:
PIN CONTACT

Description of Changes
This Product Change Notification (PCN) is to inform about a capacity enhancement tool for subcomponent used to manufacture below listed PNs (according VDA Trigger matrix No 17) in an additional production location TE Evora (acc. VDA Trigger matrix No 29). The change has no impact to form-fit-function. TE Change process follows a strict procedure, which fully maintains quality and ability to supply. Internal release process is ensured by TE. Validation will be initiated and completed according to project plan, as soon as samples are available. PSW/coversheet will be prepared (as per agreements between the two parties, including the negotiated TE trigger matrix), a request via ePPAP (via www.te.com or request to TE Sales representative) needs to be initiated by Customer 4 weeks prior to implementation date.  In case no request is obtained till above mentioned date, PPAP will be considered as approved, and the change is considered as fully released.

Reason for Changes:
Product improvement.As a result of a thorough analysis of demand picture matching our customer needs, we are going to optimize production capacity for affected PNs. Saleable products and customer drawings are not impacted by this capacity enhancement and therefore full PPAP, including dimensional report for saleable products, is not relevant.
