### **Overview**

The LM256 is an high performance, efficient, omnidirectional antenna in a compact form factor. The antenna is tuned to operate on 2.4GHz and 5GHz networks.

The dual band design makes it ideal for high speed 802.11ac applications such as wireless access points and routers, and the latest LM Technologies products such as the LM842 USB adapter and the LM843 module.

The LM256 has a 0–90-degree fixed hinge and a floating SMA that allows for 360-degree swivel rotation. It mounts directly onto RP-SMA female connectors.
