Features

1. Narrow Pitch and Compact Design

This two-piece FPC/FFC-to-board connector, with a 0.5mm pitch for FPC/FFC and PCB patterns, significantly reduces the size and weight of the end product.

〈 Mating dimensions: Right angle connection / 50pos. 〉

2. Direct FPC/FFC connection design streamlines assembly and reduces size and weight.

Assembly involves simply inserting the FPC/FFC into the plug housing and securing with the retainer, enhancing efficiency and reducing complexity. This design eliminates traditional terminals, thereby decreasing weight and conserving space by using FPC/FFC instead of discrete wires.

3. Offers both right angle and straight angle connection methods for flexible board design.

4. Center Lock Design

Center Lock Design allows for easy, one-handed insertion and removal, ensuring durable performance with a locking strength of over 40N.

5. Safe design features prevent electric shock, mis-insertion, and incorrect mounting.

Note 1 : When passing the current through all of the contacts, use 70% of the current rating.
 Note 2 : Includes temperature rise caused by current flow.If the heat resistance of the FPC/FFC is less than 105°C, the heat resistance of the FPC/FFC is applied.
 Note 3 : The term "storage" refers to products stored for long period of time prior to mounting and use.
 Operating temperature range and Humidity range covers non-conducting condition of installed connectors in storage, shipment or during transportation.
