

DISTRIBUTOR INSIGHT

Measurement Solutions

Pressure & Level • Temperature • Needle & Manifold Valves • Diaphragm Seals

Date: May 21, 2024

To: All NOSHOK Distributors & Customers

Re: Availability Ending for NOSHOK Legacy Pressure Transmitters

If you have purchased our legacy 100, 200, 300 and 615 Series pressure transmitters in recent months, you may have noticed an insert reiterating that these products are being replaced by our new re-engineered PT Series Fixed Range pressure transmitters.

The new NOSHOK PT Series portfolio provides significant performance enhancements, increased options and availability – all at reduced pricing with improved delivery times.

To crossover the legacy transmitter part numbers to the new PT Series, use the [PT Crossover Tool](#) on our website (details below).

Please be advised that our final day of production for the legacy pressure transmitters will be on 5/29/24. However, we

PT10 Series
OEM Fixed Range Pressure
Transmitter

will have a limited supply of legacy transmitters for a period of time as inventory allows.

PT20 Series
General Purpose Fixed
Range Pressure Transmitter

To further expand available options, a new DIN EN 175301-803 Form A electrical connection option will be available for the PT40 Series High Accuracy Fixed Range Pressure Transmitter in June.

Transitioning From NOSHOK 100, 200, 300 & 615 Transmitters

To streamline this transition, we have created a **PT Series Part Number Crossover Tool** for direct part number cross reference, searchable by part number or specifications.

This web page also provides information on how to select the PT transmitter that best fits customer requirements.

NOSHOK is committed to making this transition as smooth as possible for our partners.

Please reach out to the **NOSHOK Customer Support Team** with any questions.
