Clip Mount Power Resistor Thick Film Technology

LINKS TO ADDITIONAL RESOURCES

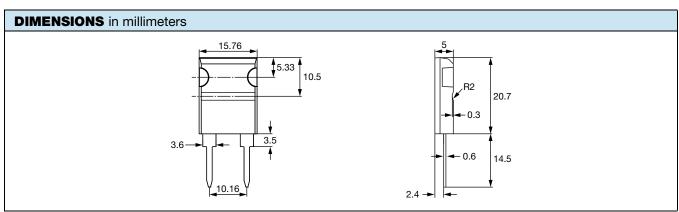

LTO 150H are the extension of LTO series. The component is used in direct contact with heatsink. Fixation done by clip. This unique design is able to absorb 30 % more energy than standard LTO 150.

FEATURES

 150 W at 45 °C case temperature heatsink mounted

- · Direct mounting ceramic on heatsink
- Broad resistance range: 1 Ω to 2.2 k Ω
- Non inductive
- TO-247 package: compact and easy to mount
- · Designed for clip mounting
- UL 94 V-0 material used compliant with EN 45545-2
- Higher pulse absorption, up to 75 J/0.1 s
- · Bended option available
- AEC-Q200 qualified
- Material categorization: for definitions of compliance please see <u>www.vishay.com/doc?99912</u>

Note

• Tolerances unless stated: ± 0.3 mm

STANDARD ELECTRICAL SPECIFICATIONS

CHOICE OF THE HEATSINK

www.vishav.com

The user must choose according to the working conditions of the component (power, room temperature).

Maximum working temperature must not exceed 175 °C. The dissipated power is simply calculated by the following ratio:

$$P \; = \; \frac{\Delta T}{[R_{TH \; (j \; - \; c)}] + [R_{TH \; (c \; - \; h)}] + [R_{TH \; (h \; - \; a)}]}^{(1)}$$

P: expressed in W

ΔT: difference between maximum working temperature and room temperature

R_{TH (j - c)}: thermal resistance value measured between resistive layer and outer side of the resistor. It is the thermal resistance of the component

R_{TH (c - h)}: thermal resistance value measured between outer side of the resistor and upper side of the heatsink. This is the resistance of the interface (grease, thermal pad), and the quality of the fastening device

R_{TH (h - a)}: thermal resistance of the heatsink

Example:

R_{TH (c - h)} + R_{TH (h - a)} for LTO 150H power rating 10 W at ambient temperature +25 °C

Thermal resistance R_{TH (i - c)}: 0.87 °C/W

Considering equation (1) we have:

$$\begin{split} \Delta T &= 175~^{\circ}\text{C} - 25~^{\circ}\text{C} = 150~^{\circ}\text{C} \\ R_{TH~(j~-c)} + R_{TH~(c~-h)} + R_{TH~(h~-a)} &= \frac{\Delta T}{P} = \frac{150}{10} = 15~^{\circ}\text{C/W} \\ R_{TH~(c~-h)} + R_{TH~(h~-a)} &= 15~^{\circ}\text{C/W} - 0.87~^{\circ}\text{C/W} = 14.13~^{\circ}\text{C/W} \end{split}$$

Example with a thermal grease R_{TH (c - h)} = 0.5 °C/W, we need a heatsink with R_{TH (h - a)} = 13.63 °C/W

	CONFIGURATION 1	CONFIGURATION 2	CONFIGURATION 3
Power Dissipation (W)	150	35	26
T° Resistive Element (°C)	175	175	175
R _{TH (j - c)} Max. (°C/W)	0.87	0.87	0.87
R _{TH (c - h)} Typ. (°C/W)	0.127	0.33	0.33
R _{TH (h - a)} Max. (°C/W)	0.069	3.09	4.57
Fluid T° (°C)	15 (water)	25 (air)	25 (air)

CONFIGURATION 1: Water cooling heatsink CP15 from Lytron (304 mm x 95.3 mm x 8 mm) with water flow rate 4 LPM and thermal grease Bluesil Past 340 from BlueStar silicones. MAX08NG from AAVID screwed clip mounting.

CONFIGURATION 2: Air cooling heatsink 0S552 from AAVID (48 mm x 80 mm x 70 mm) and thermal grease Bluesil Past 340 from BlueStar silicones. MAX03HNG from AAVID clipped mounting.

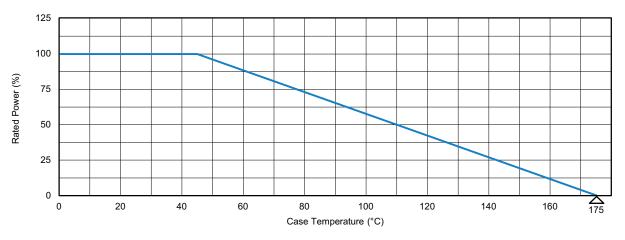

CONFIGURATION 3: Air cooling heatsink 0S550 from AAVID (31.75 mm x 58.7 mm x 70 mm) and thermal grease Bluesil Past 340 from BlueStar silicones. MAX03HNG from AAVID clipped mounting.

POWER RATING

The temperature of the case should be maintained within the limits specified.

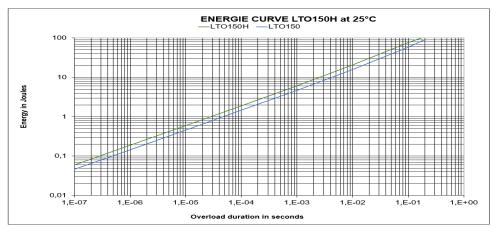

MOMENTARY OVERLOAD

In any case the applied voltage must be lower than the maximum overload voltage of 750 V during 5 s.

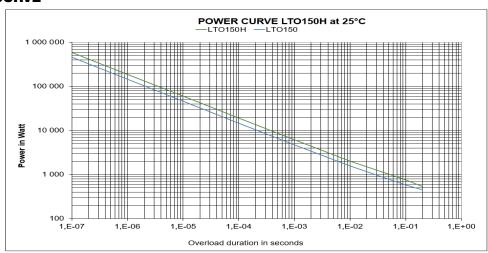

Accidental overload: the values indicated on the following graph are applicable to resistors in air or mounted onto a heatsink.

ENERGY CURVE

The values indicated on the graph below are applicable to resistors in air or mounted onto a heatsink.

MARKING

Model, style, resistance value (in Ω), tolerance (in %), manufacturing date, Vishay Sfernice trademark according IEC 60062.

CLIPS

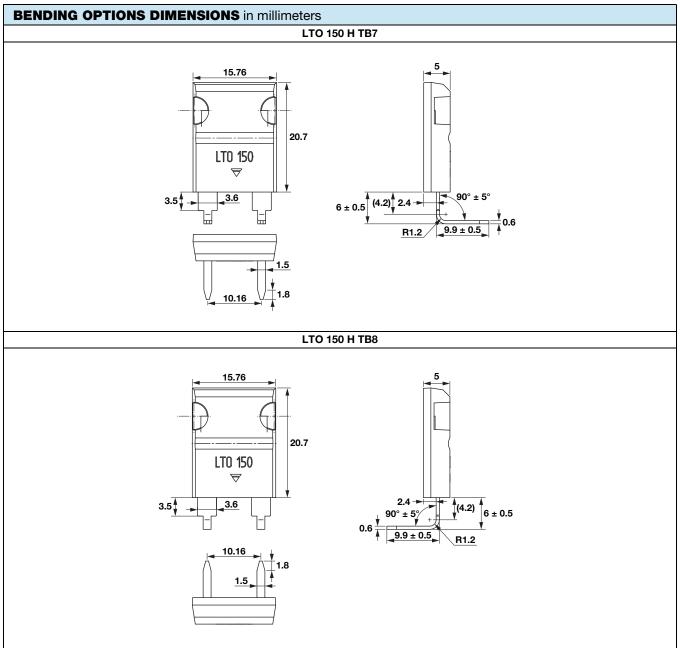

CLIP MOUNTING RECOMMENDATION

To improve the thermal conductivity, all surface of ceramic has to be coated with a thermal silicon grease. If you not use our clipped or screwed clip, it is recommended that a mounting force of 60 N to 110 N be applied to the center of the molding case of the component. Tightening torque 2 Nm when mounting screwed clip MAX08NG on heatsink.
