Experience the BEVCO difference.

Where Quality Meets Comfort

As a family-owned company, we take great pride in the work we do. Since our inception, over 70 years ago, BEVCO has built one of the brightest, most passionate teams in America. The BEVCO experience is driven by our people, process and products.

BEVCO is committed to providing safe, ergonomic, high-quality seating solutions by following industry standards in our product development process. We understand the importance that proper seating has on your health and your environment.

From the initial phases of product development through product creation, we take a customer-centered approach that focuses on creating ergonomic seating solutions that provide a more customer-satisfying experience. You can have confidence that BEVCO products comply with ANSI/BIFMA & CAL 117 standards.

Our team is passionate about delivering high quality, durable seating solutions. All of our chairs are custom-built to suit your seating requirements ensuring that you receive the lowest total cost of ownership throughout the life of your product. BEVCO offers standard task/office seating, ESD, Cleanroom and ESD/Cleanroom seating solutions.

Exceeding your expectations is the cornerstone of how we operate. Whether it's simplifying the product selection process or taking care of any concerns post-sale, your needs will always be handled with exceptional care and expertise.

We continue to operate under our founding values of honesty, integrity and excellence. With passion and hard work, BEVCO will continue to serve your ergonomic seating needs.

Learn more about the BEVCO difference.

A Well-Adjusted Workplace

The risk of musculoskeletal disorders can be significantly reduced by ensuring that your chair is properly adjusted to conform to the body and surrounding environment. Evaluate features such as seat size and depth, back height, arm height, chair height and seat/backrest tilt to properly select and adjust your chair.

CHAIR TILT

Chairs can be constructed with a variety of options to properly position the chair for maximum ergonomic comfort:

- NONE** **NO Seat or Backrest Tilt.**
Seat height adjustment. Backrest height and depth adjustment.
- TILT** **Articulating Seat and Backrest Tilt.**
The angle of the seat and backrest are adjusted simultaneously. Seat height adjustment. Backrest height adjustment.
- DLX TILT** **Independent Seat and Backrest Tilt.**
The angle of the seat and angle of the backrest can be adjusted independently of each other. Seat height adjustment. Backrest height adjustment.

BACK HEIGHT

Backrest slides up and down and locks in place to ensure proper lumbar adjustment.

SEAT DEPTH

Backrest slides in and out, on non-tilt models, providing an easy adjustment to create additional room between the seat cushion and the backrest.

SEAT HEIGHT

Chair can be raised or lowered to numerous height ranges varying between desk, mid & tall height.

ERGONOMIC RECOMMENDATIONS

The **BACKREST HEIGHT** adjustments provide proper lumbar back support to promote good posture, supporting the natural inward curve of the lower back.

SEAT DEPTH should be adjusted so there's at least 2 ½" in-between the edge of the chair's seat pad and the back of the knee. Adequate seat depth allows the user to use the lower portion of the backrest without creating pressure on the back of the knees.

SEAT HEIGHT should be adjusted so feet are flat on the floor or footring with the upper legs angled slightly downward to improve lower body circulation. The torso-to-thigh angle should not be less than 90°.

Adjust the **TILT** of the chair to a reclined posture of 100° to 110°. The neck and shoulders should be relaxed. The lower arms should be +/-90° angles, preferably resting on the chairs armrests so that the wrists are straight.

BEVCO & the Environment

As members of ANSI/BIFMA, BEVCO is proud to help create healthy, productive environments. Our design philosophy encourages sustainable decisions at each phase of the design process to reduce the negative impact on the environment while improving the overall health of the occupants. We continue to invest in better materials, methods, and manufacturing practices to foster value and innovation.

The majority of Bevco seating products are certified GREENGUARD in North America.

GREENGUARD Certification offers strict certification criteria, considering safety factors to account for sensitive individuals such as children and the elderly, and ensures that our products are acceptable for use in environments such as schools and healthcare facilities.

The GREENGUARD Certification requirements comply with the State of California's Department of Public Health Services Standard Practice for Specification Section 01350 (California Section 01350) for testing chemical emissions from building products used in schools and other environments. As such, GREENGUARD Certified products can be used to earn valuable credits in the CHPS Best Practices Manual for K-12 schools, the US Green Building Council's LEED® Green Building Rating Systems, the Green Guide for Healthcare, the NAHB Green Building Guidelines, Green Globes, Regreen and many other building codes, standards and specifications.

BEVCO chairs can be manufactured to meet the demands of most critical environment applications.

BEVCO offers ESD seating solutions for manufacturing facilities that produce PCBs and other electronic components, technical production facilities and environments dealing with delicate medical electronics. BEVCO ESD chairs are designed to meet ANSI/ESD STM12.1-2019 standards.

BEVCO's line of ergonomic cleanroom chairs are ideal for applications within the semi-conductor, aerospace, bioscience, pharmaceutical, computer, medical device, medical equipment and munitions industries. Each cleanroom chair is designed to meet the particulate goals of ISO 14644-1 with testing by an independent laboratory to certify ISO 4, 5, 6, 7 compliance.

BEVCO's ESD safe cleanroom seating solutions are for controlled environment applications that require static control. This line of BEVCO chairs are static dissipative when measured to the ANSI/ESD STM12.1-2019 standards and have been tested by an independent laboratory to certify ISO 4, 5, 6, 7 compliance.

All BEVCO upholstered chairs pass CAL 117. Components used in seating, such as foam and fabric, are tested individually for flammability characteristics. This is a minimum standard for all furniture offered for sale in California. BEVCO is not responsible for Customers Own Material (COM) upholstery fire code compliance.

Seating is a personal experience.

Work with an authorized BEVCO distributor to evaluate any chair for 30 days.

Sample chairs are made to your exact specifications and are shipped out within 48 hours so you can begin enjoying the BEVCO difference within days.

Find your best fit with our sample program.

Contact us if you need help finding an authorized BEVCO distributor at 800-864-2991 or sales@bevco.com

How to Measure Seat Height Range

STEP ONE: Sitting Elbow Height Range

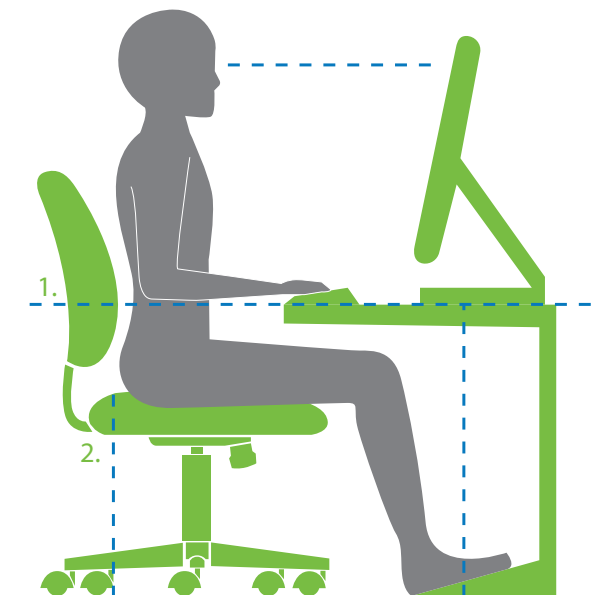

Measure the height from the floor to the top of your work surface.

STEP TWO: Calculate Seat Height

Calculate the optimal seat height range by subtracting 10" from the work surface height. This calculation should be the mid-point of the chair's seat height range.

Your seat height range should adjust at least 2½" above and 2½" below this midpoint.

It's important to select the right chair that conforms to the body and environment. Evaluate features such as seat size and depth, back height, arm height, chair height and tilt tension.

Find your optimal seat height range at [BEVCO.com/seat-height](https://www.bevco.com/seat-height)

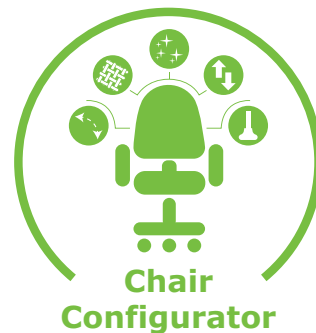

The BEVCO Difference

Over the years, we have continued to invest in better materials, methods and manufacturing practices to help improve the overall health and wellness of those using our chairs and stools. BEVCO partners with the very best supply chain, offers our chairs at competitive prices and provides excellent post-sale support to guarantee that you are receiving the lowest total cost of ownership when you invest in a BEVCO product.

Use BEVCO's advanced online chair configurator to find your optimal chair or stool. Input basic information about your environment, color/material, and size requirements and let BEVCO find the perfect seating solution for you!
