Change Notice PCN-211-2024

[SuperCapacitors, SCC and SCM Series]

Dear Valued Customer,

Thank you very much for your great and continuous support for business with KYOCERA AVX. This is the official notification that some of our products will go through a tolerance change and will be proceeded as detailed below. Please review this, and indicate your feedback for this. Notice in writing by the Feedback Due date. Your understanding and support are highly appreciated.

1. Product Type, Changes, and Customer/ KYOCERA AVX/Alternate Part Numbers:

[add or remove lines as applicable, remove example]

Change	Before Change	After Change
Tolerance of SCC/SCM	P Tolerance (+100%/-0%)	M Tolerance ($\pm 20\%$)
		S Tolerance (+30%/-10%)

Please refer to the attached documents for detailed Part Numbers and information

2. Reasons/Background:

KAVX is phasing out the P tolerance (-0% / +100%) option for our Supercap product line.

Through enhanced control of the cylindrical type Supercap (SCC and SCM series) products, the capacitance tolerances are now better aligned to the designs and applications needs of various circuit requirements.

We have achieved this improvement through focused capital investments in our machines & technologies, in addition to the overall improvements achieved in our manufacturing and production processes.
