

## Part No: FG.91.A

### Description

915MHz 7dBi Panel Antenna With 300mm RG-58 Pigtail and N-Type (M) Connector

### Features:

High-performance 7dBi 915MHz Panel Antenna Includes Wall/Pole Mounting Plate and Bolts Dimensions: 190 x 190mm x 25mm Cable: 300mm of RG-58 Connector: N-Type (Male) RoHS & Reach Compliant

## Introduction

1.

#### This Taoglas High Gain ISM Panel Antenna Series

The Taoglas FG Series of compact 868MHz and 915MHz Panel Antennas are specially designed to provide directional wireless communication for ISM band applications The panel design combines a sleek, low-profile design with high-performance, delivering superior performance characteristics. Focused on high-performance signal transmission and reception, they are perfect for applications requiring long range, resilient connections. The FG.81 covers 868MHz with a peak gain of up to 6dBi and the FG.91 operated at 915MHz with a 7dBi peak gain. Both antennas in the series exhibit exceptional efficiencies of approx. 90% at the centre bands.

Typical Applications Include:

- Industrial Wireless Communication
- Environmental and Agricultural monitoring
- Medical and Healthcare
- RFID Systems for Asset Tracking and Access Control

The IP67 waterproof rated antenna enclosure is made from UV resistant ABS making it ideal for use in challenging environments and wide temperature ranges. It is supplied with a robust mounting bracket that allows for pole or wall mounting. The FG Series is supplied with RG-58 cable and N-Type connectors as standard, both of which can be fully customised to suit your requirements pending MOQ.

For further information or samples please contact your regional Taoglas customer support team.
