# USB from Hirose Electric: Standard connections, inspired solutions.

## Overview

The CX Series connectors conform to the next-generation USB standard USB Type-C®. Its use as a standard interface is expected to spread to a wide variety of devices in the consumer, industrial machinery and automotive markets. USB Type-C® is a registered trademark of USB Implementers Forum, Inc.

## Features

### 1. USB Type-C compliant interface connector

- High speed transmission : 20Gbps / USB4 Gen.2x2  
5Gbps / USB3.0  
480Mbps / USB2.0
- Supports 5A, 48V, 240W  
(Products supporting 6A are also available.)

### 2. Reversible plug orientation ensures easy insertion

### 3. Clear Tactile Click (Excellent Lock Design)

The CX Series has a superior click feel when mating and is designed to prevent incomplete mating.

## 4. Wide Product Variation

### Receptacle

- PCB Mounting Type
  - Mid-Mount
  - Top-Mount
- Mounting Methods
  - Right Angle Hybrid (SMT+THR\*)
    - \*THR: Through Hole Reflow
  - Right Angle SMT (Double-row / Single-row)
  - Vertical SMT
- Water/Dust Resistant Type (IEC60529 Standard)
  - IP54, Test Conditions (Unmated)
    - \* Water Resistance :  
Spray 10L/min of water at 50-150Kpa for 10 minutes
    - \* Dust Resistance :  
Left the connector in a test chamber containing talcum powder with a density of 2 kg/m<sup>3</sup> and particle size less than 75 µm
  - IP68, Test Conditions (Unmated)
    - \* Water Resistance :  
Immersed in 1.5 meters water depth for 30 minutes
    - \* Dust Resistance :  
Left the connector in a test chamber containing 2 kg/m<sup>3</sup> talcum powder (particles less than 75 µm) under a maximum decompression of 2 kPa for 8 hours
  - IP69K, Test Conditions (Unmated)
    - \* Water Resistance :  
Spray 80°C water at 8-10Mpa for 30 seconds in each of 4 angles from 10-15cm
    - \* Dust Resistance :  
Left the connector in a test chamber containing 2 kg/m<sup>3</sup> talcum powder (particles less than 75 µm) under a maximum decompression of 2 kPa for 8 hours
- Available in a variety of options including space-saving, low profile and robust types

### PCB Mounting Type

### Water/Dust Resistant Type

### Receptacle Variations

## Plug

- PCB Mounting Type
  - Top-Mount
- Plug Unit, Plug Shell
- Slim Type
- Screw Locking Types
  - Dual screw
  - Single screw

Plug Variations

## 5. Halogen-free

No chlorine or bromine exceeding the standard value is used in the connector.

\* As defined by IEC 61249-2-21  
Br : 900ppm max., Cl : 900ppm max.,  
Br+Cl : 1500ppm max.

## Product Specifications

Rated Current	5A	Power : 1.25A Max. (A1, A4, A9, A12, B1, B4, B5, B9, B12) Other : 0.25A	Operating Temperature (Note 1)	-40 to +105°C
	6A	Power : 1.5A Max. (A1, A4, A9, A12, B1, B4, B5, B9, B12) Other : 0.25A	Operating Humidity Range	95% RH Max. (No condensation)
Rated Voltage	48V AC/DC Max.		Storage Temperature (Note 2)	-10 to +60°C
			Storage Humidity Range (Note 2)	15 to 70% RH (No condensation)

Items	Specifications	Conditions
Contact Resistance	40mΩ Max. (Initial)	Measured at 100mA (DC or 1000Hz)
Withstanding Voltage	No insulation breakdown	100V AC for 1 min.
Mating Durability	Contact resistance : Increase by 10mΩ or less from the initial value.	10000 insertion / extraction cycles
Overall Insertion / Extraction Force	Insertion : 5-20N Extraction : 8-20N (Initial), 6-20N (After Testing)	Measured with applicable connector

Note 1 : Includes the temperature rise due to current flow.

Note 2 : The term "storage" refers to products stored for long period of time prior to mounting and use.

Operating Temperature and Humidity Range are applicable when non-powered after PCB mounting and when temporarily stored during transportation.

Note 3 : Information contained in this catalog represents general requirements for this Series. Please refer to product specifications sheet for detail each of products.

## Materials / Finish

### Receptacle

Component	Materials	Color / Finish	Remarks
Insulator	Thermoplastic	Black	UL94V-0
Contact	Copper Alloy	Gold Plating	-
Ground Plate	Stainless Steel	-	-
Mid Plate	Stainless Steel	Nickel Plating	-
Shell	Stainless Steel	Nickel Plating	-

### Plug

Component	Materials	Color / Finish	Remarks
Insulator	Thermoplastic	Black	UL94V-0
Contact	Copper Alloy	Gold Plating	-
Lock Spring	Stainless Steel	Nickel Plating	-
Ground Spring	Stainless Steel	Nickel Plating	-
Shell	Stainless Steel	Nickel Plating	-

Note : Information contained in this catalog represents general requirements for this Series. Please refer to product drawing for details on each of the products.

# Product Number Structure

Refer to the chart below when determining the product specifications from the product number.  
Please select from the product numbers listed in this catalog when placing orders.

\*Screw locking type products comply with the “Universal Serial Bus Type-C Locking Connector Specification Revision 1.0”.  
Please refer to the standard for details.  
[https://www.usb.org/sites/default/files/documents/usb\\_type-c\\_locking\\_connector\\_specification\\_rev\\_1\\_0\\_20160309\\_0.pdf](https://www.usb.org/sites/default/files/documents/usb_type-c_locking_connector_specification_rev_1_0_20160309_0.pdf)

## Usage Precautions

1. Please handle connectors with care. Excessive external force may damage the connectors.
2. To extract the plug, hold the plug body itself and remove straight from the receptacle.  
Do not pull on the cable to extract the plug as this may damage the connector.
3. Due to the assembly process there may be some abrasions on the surface of the receptacle or plug.  
This does not have a negative impact on the performance of the product.
4. Since the surface of the receptacle is plated, the appearance may differ from lot to lot but this does not affect the product performance.

## While Taking into Consideration

Specifications mentioned in this catalog are reference values.

When considering to order or use this product, please review the Drawing and Product Specifications sheets.

Use an appropriate cable when using the connector in combination with cables.

If considering usage of a non-specified cable, please contact your sales representative.

If assembly process is done by jigs & tools which are not identified by Hirose, the warranty of the product may be affected.

If considering usage for below mentioned applications, please contact your sales representative.

In cases where the application will demand a high level of reliability, such as automotive, medical instruments, public infrastructure, aerospace/defense etc. Hirose must review before assurance of reliability can be given.
