

DAQ-908 20-Channel Actuator/General-Purpose Switch

Features

- SPDT (Form C) latching relays
- 300 V, current 1 A actuation and control

Description ▼

DAQ-908, a general purpose switch module with 20 independent single pole double throw (SPDT) relays, can be used for power cycling in DUTs, control indicator lights and status lights. DAQ-908 can also activate external power relays and solenoid valves. While combining DAQ-908 with matrix and multiplexer modules, switching systems can be customized. 300 V and 1 A contact can handle up to 50 W, which is sufficient for multiple powerline switching applications.
