

Common mode filters/Chokes

Automotive power line (for power train/safety)

ACM-V series

ACM70V type

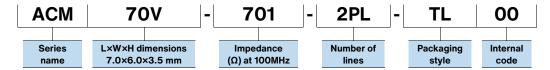

FEATURES

- Exclusive square type closed magnetic core designed as an exclusive core is used, so it can be small while maintaining the same features.
- Low profile design makes it optimal for surface mounting.
- Excellent impedance characteristics, making it great for suppressing common mode noise.
- Olt can handle up to a maximum of 5.5A, including temperature derating.
- Ocovers a wide operating temperature range from -40 to +125°C.
- Operating temperature range: -40 to +125°C(Does not include self-heating.)
- Compliant with AEC-Q200

APPLICATION

Measures against common mode noise in power lines for various DC power lines, multimedia devices, and various electronic devices, including automotive power trains and safety applications.
