PCN25-3 –  
KSA0M912 LFT Design Change

## 1. Purpose

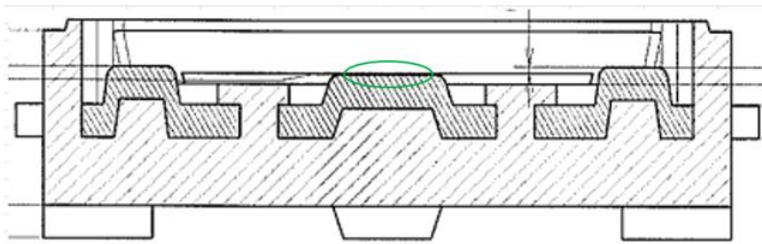

We are committed to continuously enhancing our products, and as part of these efforts, we have implemented a design improvement for our C&K KSA0M912 LFT to optimize performance and user experience.

## 2. Overview

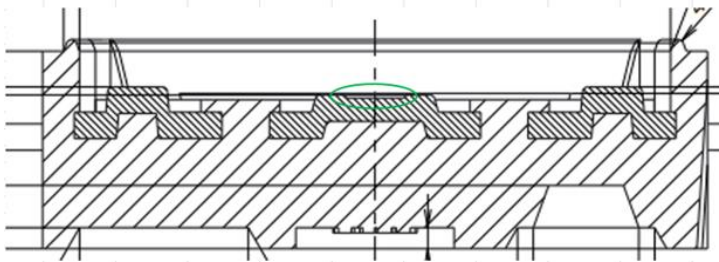

The design of the central fixed contact will be updated to align with the KSC standard, reducing the risk of intermittent lack of the electrical contact.

An anti-particle design will be implemented to create a circular electrical contact, ensuring reliable connectivity even in cases of contamination on the contact surface. This design features multiple electrical contact points, as opposed to a single flat surface, significantly decreasing the likelihood of electrical contact failure.

KSA MKII (without anti-particle design)

KSC Standard (with anti-particle design)

## 3. Impact of Change

Impact of Change: Improvement of the product performance.

---

**4. Part numbers affected**

Item Number	Item Description
Y33A91215FP LFT	KSA0M912 LFT

**5. Date of application**

Implementation: from 20 March 2025 for KSA0M912 LFT. Other part numbers from the KSA MKII series will follow at a later date.

**6. Conditions of application**

For the customers who buy the above part numbers from C&K, we kindly ask you to acknowledge this information to your Sales Representative.

**7. Support**

For any questions, please contact your C&K sales representative. We appreciate your understanding and cooperation in this matter. Our priority is to provide you with reliable products that meet your needs, and we remain committed to ensuring your satisfaction.
