Overview

Multi-Function Mounting Bracket for Guardian HP Series

The Taoglas MB.99X.A Series brackets are purpose-built to enhance the versatility and ease of mounting for the high-performance Guardian HP Series antennas. Designed for wall, pole, or window installations, the MB.99X.A ensures seamless deployment in various applications, ensuring antenna installation simpler than ever and making it a reliable choice for even the most demanding environments.

Compact Design: Measuring under 120mm square with a depth of just 77mm from the mounting surface to the antenna, the MB.99X.A bracket ensures a lowprofile, unobtrusive installation.

Ease of Installation: The bracket is connected to the Guardian by screws and the ball joint allows the antenna to be optimally positioned for best performance, regardless of the installation type with 80 degree range of motion both vertically and horizontally.

Flexible Mounting: Each MB.99X.A bracket comes with a mounting kit, including screws, washers, hose clamps, and suction cups. This all-in-one solution supports wall, pole, or window installations to meet the unique needs of your application.

Contact your regional Taoglas customer support team for further information. This bracket is fully compatible with all of our standard Guardian HP Series.
