

Designed to provide easy access to optical fibers in 7 mm microducts, this microduct slit and ring tool kit is perfect for opening ducts without damaging the fibers or microducts inside. This kit also features the following:

- Includes a cartridge to slit and ring 7 mm diameter (3 mm thickness) microducts without damaging the microducts or fibers inside
- Compact design weighing less than 6 oz with included tethering hole makes it perfect to use in tight spaces or on the go
- Magnetic cartridges can be swapped out easily
- Indicator line on top of the unit indicates the position of the blade for accurate slitting and ringing
- Blades last up to 5,000 slits/cuts
- Comes neatly packaged in a hard plastic case for organized and compact storage

All of our MS Series Mid Span Tools are patented for their unique design and functionality. Our **MS-426** won the 2019 Cabling Installation & Maintenance Gold award for innovation and our **MS-6** won the same prestigious award in 2018!
