Phase-Out Smart Connector

General

We already provided an update on the Smart Connector with Sales Information M1637 in October 2024. After re-evaluation of market needs and low engagement from our Global Customer base, we concluded not to reactivate engineering and marketing activities and to phase-out the Smart Connector DS11 / DT31 immediately.

Looking ahead we will refine and recreate our Smart components portfolio strategy in line with application focus market requirements.

The following products are affected: DS11 and DT31.

Material number	Material description
3-137-396	DT31 Power Entry Module 10A C14 C13
3-137-412	DS11 Power Entry Module 10A C14
3-138-279	DS11 Power Entry Module 10A C14

Activities Sales

Please inform your distributors and customers and ensure all information is removed from the website and let us know if there is any stock left at distributors.

Best regards,

Elisabeth Gassmann
