### **THEL-CLR Flux LED**

# multicomp PRO

#### **Typical Applications:**

- Reading lights
- Portable light
- Orientation

Garden

- Entertainment
- General lighting

Security light

Ceiling light

•

•

· Jewel display illumination

Architectural lighting

Features:

No UV

Long operating life Energy efficiency Low thermal resistance Compact design Instant light Fully dimmable

Superior ESD protection

#### **Absolute Maximum Ratings:**

Parameter	1W	
DC Forward Current	350mA	
Peak Pulse Current	500mA	
LED Junction Temperature	110°C	
Operating Temperature	-30°C to +100°C	
Storage Temperature	-40°C to +120°C	
Soldering Temperature	Manual 260°C(max) 5 Seconds	
Reverse Voltage	Manual 260°C (max) 5 Seconds	

#### Flux Characteristics at 350mA, Junction Temperature, Tj=25°C

Colour	Minimum Luminous Flux(lm)	Typical Luminous Flux(Im)	Max. Luminous Flux(Im)	Beam Pattern
Red	40	50	-	Lambertian

Notes :

1. Luminous flux is measured with an accuracy of  $\pm 10\%$ 

#### Optical Characteristics at 350mA, Junction Temperature, Tj=25°C

Dominant Wavelength λd Peak WavelengthColourλp or Colour Temperature (CCT)		Viewing Angle Degree	
	Min.	Max.	201/2
Red	620 nm	630 nm	135

Notes :

1. CCT ±5% tester tolerance.

2. Wavelength is measured with an accuracy of ±0.5nm.

## multicomp PRO

#### Diagram

Dimensions : Millimetres Tolerance : ±0.2mm

#### Notes:

The polarity of the slug at the bottom is anode.

It is important that the slug can't contact the aluminium surface; it is strongly recommended that there should coat a uniform, electrically isolated heat dissipation film be coated on the surface.

It is strongly recommended that the temperature of lead not be higher than 70°C.

#### Part Number Table

Description	Part Number
