Flasher Compact

Overview

The Flasher Compact is a space-efficient counterpart to the Flasher PRO that is ideal for integration into production rigs or automated test equipment (ATE) where Ethernet connectivity is not needed. Paired with the Flasher Hub-4 or Flasher Hub-12, it enables highly efficient gang-programming solutions
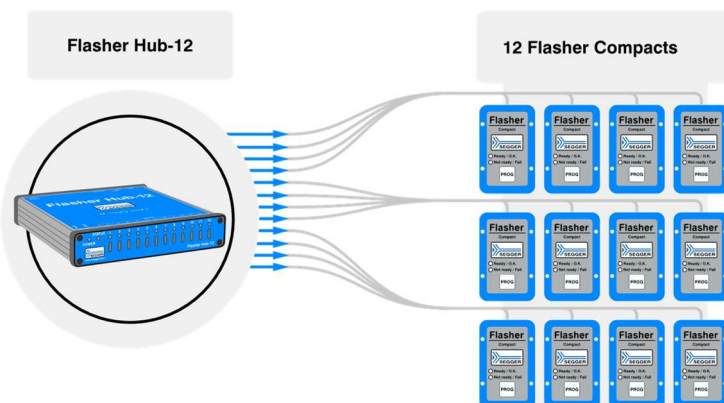

Key features

- High speed production programmer
- Supports a wide range of target interfaces
- When combined with Flasher hub can be configured for gang programming of up to 24 independent targets simultaneously

Specification

- USB powered, maximum 130 mA (idle)
- USB 2.0 (hi-speed); USB-C
- Male 20-pin IDC keyed box header with 0.1" pitch (2.54mm); optional adapters available
- Supported target interfaces, SPI, QSPI, 8051 C2, cJTAG, FINE, ICSP, IIC, ISP, JTAG, PDI, SPD, SWD, SWIM, UART, UPD
- When combined with Flasher Hub & SEGGER Hub can program up to 24 independent targets simultaneously (gang)

Package content

- Fasler Compact
- USB cable
- 20-Pin Target cable
