

RJFTV™ - PLUG AND RECEPTACLE WITH 360° EMI BACKSHELL

Description

These RJFTV™ kits include all components necessary to build up a totally 360° EMI shield solution. Receptacle kits are mainly composed of an 360° backshell and the RJFTV™ PCB receptacle with 8 tinned holes for solder termination. With those receptacle kits provided without cable, you will have to solder your cable on the PCB. The plug kit is composed with the 360° backshell where you will have to include your own RJ45 cordset. You can find below, wires and shielding wire cabling specification.

We recommend to use our reinforced Ethernet cable (page 75). If you prefer to use your own cable, please check with us compatibility with our kit.

If you would like to receive a complete 360° EMI shield receptacle already mounted with a define length of cable, please consult us.

Overall dimension

Plug - Shell type 6 - Straight backshell - Metal gland
