Solex 15 Product Retirement Notification

1. Overview

The Product Management team would like to inform you of an update regarding our Solex 15 range of beacons. All Solex 15 products are reaching their end-of-life period as the Xenon flash tube that they feature is being made obsolete. Solex 3 and Solex 10 products will be unaffected by this change due to their use of an alternative flash tube.

We welcome customers to place last-time-buy orders up until the 1st October 2025. From this date we will no longer be able to accept orders for this product range.

2. Affected products
