Terminal SMD PPTC Assembly Automation

Dear Valued Customers,

Littelfuse announces adding a fully automated assembly line to further improve production efficiency and capacity for Terminal SMD PPTC products. Current semi-automated assembly line will be maintained as back up production line to support the needed production plan.

All products have completed thorough qualification. This fully automated assembly line has no impact to product's original electrical parameters, dimension, quality, reliability and part numbers. Qualification data and samples are available upon request.

This will be a rolling change, effective as of August 18th, 2025.

Please refer to the following affected part number list and a picture of automation line
