Bourns® CC322522A, CC453232, CC453232A, CM322522, CM453232, PM1210, and PM1812 Series Chip Inductors

Pin Supplier and Varnish Process Change

Riverside, California – June 10, 2025 – In order to support our fast-growing demand, enhance continuity of supply and provide maximum flexibility to customers, effective January 12, 2026, Bourns will change the pin supplier for the [CC322522A](#), [CC453232](#), [CC453232A](#), [CM322522](#), [CM453232](#), [PM1210](#), and [PM1812](#) Series Chip Inductors. Additionally, the varnish process that was applied only to some part numbers in the series will be removed. The supplier has been qualified and is included in the Bourns Authorized Vendor List. A list of affected part numbers is included below.

The form, fit, function, quality, and reliability of the inductors will not be affected by the change. Traceability will be maintained through lot code and date code.

Samples built with the above changes are available on request. Bourns recommends that customers test the affected part numbers in their specific applications for verification of satisfactory performance.

Implementation dates are as follows:

Date that deliveries of products manufactured using pins from the existing supplier and the current varnish process will cease: **January 11, 2026**

Date that deliveries of products manufactured using pins from the new supplier and no varnish will begin: **January 12, 2026**

First date code using the above changes: **2603**

If you have any questions or need additional information, please feel free to [contact Customer Service/Inside Sales](#).

Users should verify that the described changes will not impact the performance of the product in their specific applications.
