Features:

- Professional unit-with heater-in full stainless steel with electronic touch-pad controls.
- Stainless steel lid.
- Basket.

Ultrasonic Cleaning is a unique phenomenon. Millions of tiny bubbles are created when ultrasonic sound is passed through liquid. It is these tiny bubbles combined with a huge pressure that creates incredible cleaning results.

This method of cleaning is particularly suited to cleaning otherwise difficult items such as instruments, tools, clock parts, airbrushes, printer heads, motors and burner jets.
