

BLUETOOTH MUSIC ANGEL - Universal

PMR offers the latest gadget for the MP3 enthusiast. The 'Music Angel' plugs directly into any MP3 player with 3.5"mm jack audio socket and allows you to connect to your Bluetooth Mobile Phone allowing you to accept incoming calls from your mobile phone.

Never again do you have to remove your headset in order to take a call from your mobile. You simply accept the call or reject and then after the call is complete go back to listening to your music.

This allows both your MP3 player and mobile phone to be hidden away discretely and not in view to the general public. This is a great advantage in crowded congested environments like the train, bus and underground.

The Music Angel Universal has built in Li-Polymer battery and microphone and therefore can be used as a Bluetooth Headset independently of the MP3.
