it's all about

SPEED - SanDisk Ultra II
is Ready for
Rapid-Fire Shooting

The Faster the Action... the Better We Perform

Face it, today's digital photography is all about speed. The speed to capture that "once-in-a-lifetime" shot. The speed to take more shots in less time. And the speed to transfer large image files faster to your PC. If pure speed is important to you, then get ready to fasten your seat belt. The SanDisk Ultra® II product family is designed to blow you away!

SanDisk
Ultra® II

The SanDisk Ultra II CompactFlash®, SD™, SD Plus, Memory Stick PRO™ and Memory Stick PRO Duo™ cards have a minimum sustained write speed of 9 megabytes (MB) per second and a read speed of 10MB per second*. Get faster speed for all the things you do:

- Faster write speed means less time between shots.
- Ready for rapid-fire shooting.
- High-density flash memory and optimized controller technology let you save large image files faster.

9MB/sec = 60X
10MB/sec = 66X
<small>Note: 150KB/sec = 1X in benchmark testing</small>

*Performance based on HD Bench software testing.

Superior Performance for Advanced Digital Photographers

In the fast-paced world of digital photography, you rely on your camera and its capabilities. You also rely on your SanDisk Ultra II cards to be fast, reliable and compatible with your camera. To meet the needs of professional and advanced photographers, SanDisk has developed optimized flash cards that:

- Take advantage of the advanced features of high mega pixel digital cameras.
- Deliver superior speed. Now you can capture those high-resolution images even faster!
- Do it all with lower power consumption, which means longer battery life.

SanDisk Ultra II cards are ideal for your most demanding photo shoots, including photo journalism and event, sports, nature and fashion photography.

SanDisk Quality and Reliability

SanDisk is the worldwide leader in flash memory cards. The SanDisk Ultra II CompactFlash, SD, SD Plus, Memory Stick PRO, and Memory Stick PRO Duo cards are designed for heavy use by professional and advanced digital photographers and they're covered by a 10-year limited warranty as well!

Lower Power Consumption

The SanDisk Ultra II cards minimize power consumption to maximize your camera's battery life. So you get more shots per battery charge.

Operating Voltage Range Summary

Product	Voltage
CompactFlash	3.3V and 5V
Memory Stick PRO	2.7V and 3.6V
Memory Stick PRO Duo	2.7V and 3.6V
SD	2.7V and 3.6V

Capacities Available**

SanDisk Ultra II CompactFlash Card
Available in 512MB, 1GB, 2GB, 4GB,
and 8GB***

SanDisk Ultra II SD Card
Available in 512MB, 1GB and 2GB

SanDisk Ultra II SD Plus Card
Available in 512MB and 1GB

SanDisk Ultra II Memory Stick PRO Card
Available in 512MB, 1GB,
2GB and 4GB

SanDisk Ultra II Memory Stick
PRO Duo Card
Available in 512MB, 1GB and 2GB

** 1 megabyte = 1 million bytes; 1 gigabyte = 1 billion bytes. Not all devices support SD 2.0GB cards. Contact your device manufacturer for details.
*** 8GB supports FAT32 SLRs only.
