

AT6550 40 Micron Foil Ducting Tape

Applications

A 40 micron thick aluminium silver foil used for the insulation of heater casings and high pressure steam pipes, closing air duct insulation and for the joining of foil faced insulation panels. AT6550 meets BS476/Part 6 & 7 Category 1 specification for flame retardancy.

Features

- Meets BS476/Part 6 & 7 Category 1 specification
- Flame retardant
- Excellent temperature resistance from -20°C to +110°C
- Good UV and water resistance
- Conformable to irregular surfaces

Technical detail

Thickness 0.08mm
Breaking load 22 N/cm
Elongation 5%
Adhesion
Steel 3.8 N/cm
Service temp -20°C to +110°C
