

5 LED FLASHLIGHT

Aluminium TITANIUM

Crystal
LED
Reflector

Anodized
5 LED

- CNC Machined from solid aircraft grade aluminium
- Highly visible can be seen from more than 3000 meters away
- UNIQUE Nickel plated rotary micro switch built into the head
- Fitted with 5x0.5mm NICHIA High Intensity, super-bright White LEDs, which have 100,000 hours life and never need to be replaced

- The LEDs in this Flash-Lite produce brightness of up to 22,000 MCD per lamp and never need to be replaced.

This powerful precision made LED Flash-Lite is a breakthrough in technology using advanced miniaturized electronic circuitry.

These high Intensity super-bright LEDs are brought together by Uni-Lite to make one of the most powerful LED Flash-Lites in the world.

The 5x0.5mm pure white NICHIA LEDs allows you to see the real colours at night unlike conventional flashlights.

2xAA Alkaline Batteries are included

The advanced electronics in this Flash-Lite are so energy-efficient they give up to 10 times more battery life.

The most technically advanced LED aluminum Flash-Lite ever made
