

XTRA Power LED

Aluminium Penlight

Alkaline Batteries
are included

There is a difference in the light from LEDs versus filament bulbs.

The soft cool light of an LED actually mimics daylight. You get a bluish-white light that's easy on the eyes and helps you look into the dark without such a stark contrast between the light beam and what's around it, the Uni-lite LED Penlight is designed for this purpose.

The NICHIA LED bulb is 10x brighter than a regular filament bulb. It's lightweight and durability makes it a favorite with the Medical profession and Technical Electricians Plumbers Contractors etc

Part of the
UNI-LEDS
Range

CNC Machined from solid aircraft grade aluminium

Push button micro switch operation

1.8 lumens of output power Up to 22 hrs

Continuous Use.

Lightweight / Compact and extremely powerful

Highly visible can be seen from more than 3000 meters away

Fitted with 5mm NICHIA High Intensity, super-bright White LED which has 100,000 hours life and never needs to be replaced

Sophisticated electronics in this Penlight allows you to use 2 standard AAA Alkaline Batteries
