Mag Instrument is dedicated to the highest standards of integrity. We seek performance and a reputation reflecting the very best we can achieve. Each Mag Instrument flashlight represents a culmination of more than 25 years of research, development, testing and continuous state-of-the-art refinement in every precision feature.

Mr. Maglica has guided his company's growth from a one-man machine shop in 1955 to an enterprise that employs approximately 800 dedicated employees today. But his work does not stop there. Mr. Maglica continues his commitment to quality by continually improving upon the product that bears his name.

Mag Instrument is proud to be a leader in the current renaissance in American manufacturing. Mr. Maglica himself, a fervent believer in the importance of manufacturing in the United States, insists that the manufacture of Mag Instrument's flashlights remain U.S.-based. He has dedicated himself to proving that American products can excel in the global marketplace by using technology to continuously improve quality and reduce costs. Over the last two decades, Mr. Maglica's innovations have enabled Mag Instrument to offer consumers a consistently better value than the competition.

Strengthen American Manufacturing
Mag Instrument is the only flashlight company with significant market share that still manufactures its entire line of flashlights in the United States. Unlike its competitors, Mag Instrument has chosen not to outsource the manufacturing of its flashlights to foreign countries in order to take advantage of cheap labor and less stringent environmental standards, which may also result in inferior quality. The outsourcing of manufacturing by other U.S. companies has caused hundreds of thousands, if not millions, of jobs in the United States to be lost. Indeed, if Mag Instrument had chosen the path of other flashlight companies, the jobs of its approximately 800 employees in Ontario, California would have been lost.

Trademark Information
The distinctive shapes, styles and overall appearances of all Mag® flashlights, and the circumferential inscriptions extending around the heads of all Mag® flashlights are trademarks of Mag Instrument, Inc. The circumferential inscription on the head of every flashlight signifies that it is an original Mag® flashlight and part of the Mag® family of flashlights. For warranty details, see your Mag-Lite® product retailer, the package literature, or call Mag Instrument, Inc., at (909) 947-1006. You may also email: salesdesk@magmail.com or visit our website at www.maglite.com for more information. To find the warranty terms applicable in a particular country, click on “Customer Service” and select that country when prompted.
Mini Maglite® AA & AAA flashlights convert quickly to a free standing candle mode, for convenient, hands-free light whenever you need it!

Step 1: Unscrew flashlight head
Step 2: Place head down on table
Step 3: Set flashlight into head

A patented, self-cleaning switch fights the buildup of performance-degrading deposits on the contacts. The result is an extremely durable, reliable switch.

The Solitaire® flashlight features an innovative extended key lead that allows the light beam and keys to be used together in the same direction.

Design balanced optics and power for improved performance
Anodized inside and out for improved corrosion resistance and durability
All Mag® flashlights include a spare lamp inside the tail cap.*
Water and shock resistant
High-grade rubber seals in every size flashlight
Precision machined high-strength aluminum alloy cases

Roller bearing
Cam action
All Mag-Lite® flashlights feature a high intensity fast focusing adjustable beam.

All Mag® flashlights are designed, patented and manufactured in the U.S.A. May contain some imported components.

Backed by Mag Instrument’s Renowned Warranty Service.
Limited lifetime warranty in the Western Hemisphere and Japan; ten-year limited warranty elsewhere. See product packaging for details.

Mag-Lite® C & D Cell flashlights feature a Cam Action Fast Focusing Beam
Our exclusive cam-driven focusing system changes the beam from a wide angle flood to an intense spot with just a quick twist of the head.

All Mag-Lite® flashlights feature a high intensity fast focusing adjustable beam.

Constant battery contact
Unique design provides battery protection
One piece construction
A patented, self-cleaning switch fights the buildup of performance-degrading deposits on the contacts. The result is an extremely durable, reliable switch.
Anthony Maglica, known for his obsession with precision engineering, craftsmanship and commitment to perfection, was not satisfied with the performance of a “regular” LED as a usable light source. Mr. Maglica set his sights on producing an LED light source that would have the kind of durability, reliability, and performance Maglite® flashlights are known for. With an emphasis on uncompromising performance, MAG-LED™ Technology is the result of that quest. The benefits include:

- **A Powerful Projecting Beam** that focuses simply by rotating the head.
- **Balanced Optics™**, combining a highly refined reflector with a quality LED, for a brilliant adjustable beam.
- **Intelligent Energy Source Management** (patent pending) balancing high brightness with efficient power usage.

PLUS: All of the quality features professionals and consumers expect from a Mag® flashlight:

- Rugged, machined aluminum construction with knurled design.
- Anodized inside and out for improved corrosion resistance.
- Water and shock resistant.

Maglite® flashlight, renowned for its quality, durability, and reliability, is now available with the new MAG-LED™ Technology. Designed for professional and consumer use, Maglite® LED flashlights build on the experience in craftsmanship, engineering, and advanced technology evident in all Mag® flashlights. The Maglite® flashlight is internationally accepted as the Professional Flashlight®. Built tough enough to last a lifetime, its durability and patented features now combined with the new MAG-LED™ Technology make the Maglite® LED flashlight a technologically advanced lighting instrument. Available in 2, 3, & 4 Cell D size, the benefits include:

- **A Powerful Projecting Beam** that focuses simply by rotating the head.
- **Balanced Optics™**, combining a highly refined reflector with a quality LED, for a brilliant adjustable beam.
- **Intelligent Energy Source Management** (patent pending) balancing high brightness with efficient power usage.

PRODUCT DETAIL INFORMATION BLISTER PACKS:
2-Cell D Package Includes:
Maglite® LED 2-cell D Flashlight
3-Cell D Package Includes:
Maglite® LED 3-cell D Flashlight
4-Cell D Package Includes:
Maglite® LED 4-cell D Flashlight

Mag-Lite® LED D-Cell Flashlights are also offered in a variety of colors (refer to color guide below).
Upgrading any C or D size Maglite® flashlight (2, 3, or 4 Cell) is as easy as 1, 2, 3.

Step 1
Unscrew the Maglite® flashlight head assembly.

Step 2
Unscrew the retaining collar and remove lamp.

Step 3
Insert LED Module and replace retaining collar and head assembly.
**Mag Charger® Rechargeable Flashlight System (Ni-Cad)**

**FEATURES**

- Easily replaced high-intensity halogen lamp
- 1/4 turn, cam action focus, spot-to-flood
- Self-cleaning rotary switch, 3 position, On, Off, and Signal (Manual, Momentary On-Off)
- Charger operates on A/C or D/C current
- Flashlight can be charged in any position.
- Highly polished, scientifically designed, metallic reflector, withstands extreme temperatures.
- Tempered glass lens.
- Durable extra hard anodized finish
- Limited Lifetime Warranty in the Western Hemisphere and Japan; Ten-Year Limited Warranty Elsewhere.
- Individually serial numbered
- Flashlight designed, patented and manufactured in U.S.A. May contain some imported components. Certain accessories imported.

**Without question, our ultimate lighting tool.**

**Mag Charger®**

**Rechargeable Flashlight Only** (ARXX014)

**Spare Halogen Lamp Included in Tail Cap**

**Now With Brighter, Next-Generation Halogen Lamp**

**Versatile**

- Tight spot or wide-angle flood
- Patented quick-focusing “continuous cam-action” operates with a quarter-turn of the flashlight head – Charging Cradle mounts securely in any position with minimal space, AC or DC – Flashlight can be charged in any position.

**Reliable**

- A proven performer all day, every day; all night, every night – Self-cleaning rotary switch 3-position; on, off, and signal (manual, momentary on-off).

**Durable**

- Sleek black finish, hard-anodizing inside and out for improved durability – Water resistant seals throughout for resistance to weather and harsh environmental conditions.

**Fit and Finish**

- Precision machined high-strength aluminum alloy case – Individually serial numbered for identification – A back-up Halogen lamp is stored in the tailcap, o-ring sealed.

**Performance**

- Next generation optical reflector
- A high-tech metallic reflector, combined with a tempered glass lens that delivers superior optical performance – up to 2-Hours On-Time*.

**Purchase with Confidence**

- Mag's warranty (limited lifetime warranty in Western Hemisphere and Japan, ten-year limited warranty elsewhere) is backed by Mag's international network of Warranty Service Centers.

Mag-Lite® D-Cell Flashlights

Black - 2, 3, 4, 5, & 6 D-Cell
Blue - 2, 3, & 4 D-Cell
Camo - 3 D-Cell Only
Gray - 2, 3, & 4 D-Cell
Red - 2, 3, 4, 5, & 6 D-Cell
Silver - 2 & 3 D-Cell

Every Mag-Lite® flashlight embodies a precise balance of refined optics, efficient power, durability and quality. Each Mag-Lite® D-Cell flashlight includes two high intensity White Star® Krypton Gas Lamps for enhanced brilliance and extended range.

FEATURES
• High-intensity light beam
• 1/2 turn, cam action focus, spot-to-flood
• Self-cleaning rotary switch, 3 position, On, Off, and Signal (Manual, Momentary On-Off)
• Spare replacement lamp safely secured in the tailcap (see page 3)
• High-strength aluminum alloy cases
• O-ring sealed for water resistance
• Limited Lifetime Warranty in the Western Hemisphere and Japan; Ten-Year Limited Warranty Elsewhere.
• Individually serial numbered
• All Mag® flashlights are designed, patented and manufactured in the U.S.A. May contain some imported components.

Mag-Lite® D-Cell flashlights are also offered in a variety of colors (refer to color guide below).

COLOR GUIDE
Black - 2, 3, 4, 5, & 6 D-Cell
Red - 2, 3, 4, 5, & 6 D-Cell
Silver - 2 & 3 D-Cell
Blue - 2, 3, & 4 D-Cell
Gray - 2, 3, & 4 D-Cell
Camo - 3 D-Cell Only

Mag-Lite® C-Cell Flashlights

Black - 2, 3, & 4 C-Cell
Red - 2, 3, 4, 5, & 6 D-Cell
Silver - 2 & 3 D-Cell
Blue - 2, 3, & 4 D-Cell
Gray - 2, 3, & 4 D-Cell
Camo - 3 D-Cell Only

The Mag-Lite® C-Cell flashlight embodies the same precise balance of refined optics, efficient power, durability and quality as the D-Cell Flashlights in a smaller, lighter weight design. Each Mag-Lite® C-Cell flashlight includes two high intensity White Star® Krypton Gas Lamps for enhanced brilliance and extended range.

2-Cell C Mag-Lite® Flashlight
3-Cell C Mag-Lite® Flashlight
4-Cell C Mag-Lite® Flashlight

FEATURES
• High-intensity light beam
• 1/2 turn, cam action focus, spot-to-flood
• Self-cleaning rotary switch, 3 position, On, Off, and Signal (Manual, Momentary On-Off)
• Smaller & lighter than the D cell

COLOR GUIDE
Black - 2, 3, & 4 C-Cell

The Mag-Lite® C-Cell flashlight embodies the same precise balance of refined optics, efficient power, durability and quality as the D-Cell Flashlights in a smaller, lighter weight design. Each Mag-Lite® C-Cell flashlight includes two high intensity White Star® Krypton Gas Lamps for enhanced brilliance and extended range.

The Mag-Lite® C-Cell flashlight embodies the same precise balance of refined optics, efficient power, durability and quality as the D-Cell Flashlights in a smaller, lighter weight design. Each Mag-Lite® C-Cell flashlight includes two high intensity White Star® Krypton Gas Lamps for enhanced brilliance and extended range.

*Peak Beam Candlepower and Battery Life Continuous on Time are approximate and may vary between flashlights, lamps, and/or batteries.
Quality and dependability are the hallmarks of our flashlights. We insist upon the same quality and dependability for every lamp and accessory. Each Mag-Lite® and Mini Maglite® lamp is specifically designed to work in conjunction with the reflector to deliver optimum performance.

1 Measured against prior-generation (Krypton) Mag-num Star® lamps, peak beam candlepower ("PBC") of new (as of early 2003) Xenon Mag-num Star® lamp ranged from 100% higher for 2D-cell lamp to 27% higher for 6D-cell lamp, average PBC increase across the range of lamps (2D-cell through 6D-cell) being 59%. All performance figures are approximate. Actual performance can vary due to manufacturing variations in flashlights, lamps, and/or batteries.

Mag-Lite® C & D Cell
The Ultimate Upgrade™
Magnum Star®. Xenon lamps are now available for C & D Cell genuine Mag-Lite® flashlights. Upgrade today and experience the next generation in lamp technology.

Move Up To Xenon!
Up To 100% Brighter™
Magnum Star® Xenon lamps are now available for C & D Cell genuine Mag-Lite® flashlights. Upgrade today and experience the next generation in lamp technology.

Call: (909) 947-1006, email: salesdesk@magmail.com or visit our website: www.maglite.com

Better, Brighter, Next-Generation Halogen Lamp³
The improved Mag-Lite® Halogen lamps now come as standard "factory equipment" on the Mag Charger® Rechargeable Flashlight System and are available separately. Upgrade today and experience the next generation in lamp technology.

³ The prior generation lamp, introduced in early 2002, produced up to 41,200 peak beam candlepower (PBC). The newest generation lamp was found in June 2005 tests to produce up to 51,700 PBC — a 25% increase. All performance figures are approximate. Actual performance can vary due to manufacturing variations in flashlights, lamps and batteries.

Krypton

Maglite® C & D Cell
White Star® Replacement Lamps
Now Up To 69% Brighter²
White Star® Krypton lamps are installed as "original equipment" on all C & D cell genuine Mag-Lite® flashlights. Upgrade your existing flashlight today and experience the next generation in White Star® lamp technology.

² Measured against prior-generation White Star® lamps, peak beam candlepower ("PBC") of new (as of early 2003) White Star® lamp ranged from 69% higher for 3D-cell lamp to 20% higher for 6C-cell lamp, average PBC increase across the range of lamps (2-cell and 6-cell) being 58%. All performance figures are approximate. Actual performance can vary due to manufacturing variations in flashlights, lamps, and/or batteries.
Available for D and C Cell Mag-Lite® and AA Mini MagLite® flashlights.

Black Cordura®/Nylon Full Flap Holster, Mini MagLite® 2-Cell AA Flashlight (AM3A026)

Camo Cordura®/Nylon Full Flap Holster, Mini MagLite® 2-Cell AA Flashlight (AM3A136)

Ballistic Fabric Full Flap Holster, Mini MagLite® 2-Cell AA Flashlight (AM2A426)

Black Leather Holster, Mini MagLite® 2-Cell AA Flashlight (AM2A026)

• Rugged woven nylon
• Weather resistant, locked stitch, nylon thread
• Velcro® interlocking front and back flaps for quick attachment and sure retention

• Tri-laminate Accumold® construction
• Ballistic grade woven fabric
• High density closed cell foam center.
• Smooth Coptex® lining
• Velcro® interlocking flap closures

• Full grain genuine leather
• Heavy duty, weather resistant, locked stitch thread
• Solid brass snap for quick attachment

Traffic Wand Kits with reflective tape for C-Cell & D-Cell only.

Did you know there was a National Law Enforcement Officers Memorial in 1991?

It honors America’s federal, state and local law enforcement officers who have given their lives in the line of duty, dating back to the first known death in 1792.

Designed by Washington, D.C., architect Davis Buckley, the Memorial sits on three acres of federal park land called Judiciary Square. The site has served for some 200 years as the seat of our nation’s judicial branch of government. A plaza around the space finds lush carpets of grass, nearly 800 plants and 123 trees decorating the Memorial grounds. Each year, around the first of April, some 14,000 orange and yellow daffodils make the Memorial one of Washington’s most spectacular attractions. Bordered by the Memorial’s beautifully landscaped park are two tree-lined “pathways of remembrance” where the names of the fallen officers are engraved.

Each of the pathway entrances are adorned with a powerful statue of an adult lion protecting its cub. The bronze statues were sculpted by Raymond Kaskey. They symbolize the protective role of our law officers and convey the strength, courage and valor that are the hallmarks of those who serve the law enforcement profession.

An inscription on the Memorial’s east wall explains the uplifting spirit that is felt by every visitor to the Memorial: “In valor there is hope.”

President George Bush, Sr. in his dedication of the memorial in 1991, said: “Mag was one of three original corporate sponsors to the Memorial Fund. John Wyatt, Vice President of Sales, attended the event on behalf of Mag and remarked at the time that, “Mag’s contribution is our way of showing our gratitude for the support that Mag-Lite® flashlights have received from law enforcement officers across the nation.”

Mag has supplemented its initial commitment during the past ten years in order to help ensure that the men and women who have laid down their lives for our protection will never be forgotten.

The Need

The need for a museum first became evident soon after the National Law Enforcement Officers Memorial was completed and there was a keen interest expressed by many visitors in learning the stories behind the thousands of officers memorialized. In 1983, a small Memorial Visitors Center was established near the monument. By 1987, the museum vision had grown and the NLEOMF decided to make the creation of a “Smithsonian-like law enforcement museum” its number one long-term objective. The museum’s mission is to increase public support for law enforcement and to promote law enforcement safety.

Dating back to the first fatality in 1792, more than 17,000 officers have suffocated their lives in the line of duty. Yet despite the dangers and other difficulties of the job, there are more than 17,000 federal, state and local law enforcement officers serving proudly today in communities across America, putting their lives on the line for the safety and protection of others. It is an incredible story of service and sacrifice that, for the most part, has gone untold. As a result, many Americans continue to take our police officers for granted. The National Law Enforcement Museum will help to generate a better understanding and appreciation of the vital contributions our law officers have made to our nation.

“Clearly, the courage and sacrifice displayed by our law enforcement officers is having a profound and positive effect on our society,” declared Senator Ben Nighthorse Campbell after the museum legislation passed. “Establishing this memorialized. In 1993, a small Memorial Visitors Center was established near the monument. By 1987, the museum vision had grown and the NLEOMF decided to make the creation of a ‘Smithsonian-like law enforcement museum’ its number one long-term objective. “Clearly, the courage and sacrifice displayed by our law enforcement officers is having a profound and positive effect on our society,” declared Senator Ben Nighthorse Campbell after the museum legislation passed. “Establishing this museum is in the legal we can do to honor them and ensure that their stories of heroism and sacrifice are never forgotten.”

The Site

The museum will be located in the heart of our Nation’s Capital in a historic setting called Judiciary Square (600 block of E Street, NW). Appropriately, the museum site is directly across the street from the National Law Enforcement Officers Memorial, which was established in 1989. This property is surrounded by court buildings, the original City Hall for the District of Columbia, and the National Building Museum. This is a thriving area of downtown Washington that already attracts millions of tourists each year.

In the Community

If you know there is going to be a National Law Enforcement Museum?

National Law Enforcement Officers Memorial

PAST, & PRESENT

Overview

In 2000, a law (P.L. 106-492) passed by the United States Congress and signed by President Clinton authorized a national law enforcement museum to be built on federal property in Washington, D.C. The museum will be privately funded and will be developed, constructed, owned and operated by the National Law Enforcement Officers Memorial Fund (NLEOMF)—the same nonprofit organization that built and now oversees the National Law Enforcement Officers Memorial. Construction is expected to commence in 2007. The museum opening is scheduled for 2009. The museum will reach a broad and diverse audience, with attendance expected to be as high as half a million visitors a year, including 40,000 students on class trips.
