

Wiha. Premium Tools  
for Professionals.

**Wiha Interchangeable & Reversible Blade System. The Ultimate in Tool Set Flexibility.**

The Wiha interchangeable and reversible blade systems offer the perfect solution when functionality and flexibility are required. The broad product programme has the right tool for every application.

The user-oriented handles are adjusted to suit a wide variety of different application areas. Each of these handles has a mature ergonomic design, fit comfortably into the hand and ensure optimum torque transmission. The blades can be selected individually and, if necessary, quickly and easily exchanged.

The Wiha interchangeable and reversible blade systems are separable, space saving and can be extended at any time. The ideal tool for maintenance, service and leisure activities.

The following versions are available:

**Wiha System 6:**

The diverse 6 mm interchangeable blade system

**- System 6 Security:**

With 6 mm interchangeable blades for the most common security screws, Tri-Wing®, Torq-Set® and TORX®TR

**- System 6 Magnetic:**

With built-in Magnetiser/Demagnetiser

**Wiha 6 mm**

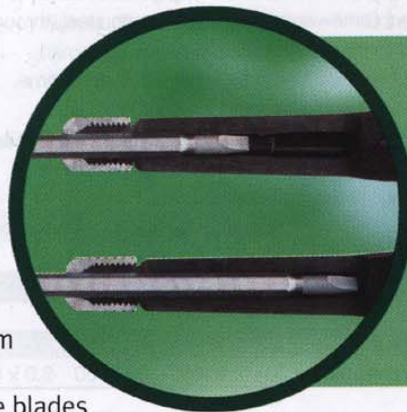

**Reversible Blade Programme:**

With 6 mm reversible blades

**Wiha 4 mm**

**Reversible Blade Programme:**

With 4 mm reversible blades, specially for precision mechanics applications.

*The Telescopic system enables rapid adjustment of the visible blade length.*

**Product Advantages:**

- One handle, different blades
- Flexible system that can be extended at will
- Handles for every application
- Different blade series for maximum flexibility
- Blades made of high-quality chrome-vanadium steel, through hardened and anti-corrosion surface treated
- Ideal as maintenance and service tool, separable and space saving
