S P E C I F I C A T I O N S

Product Type
Light Emitting Diode Module

Model No.
GW5BTC65K00

※These specifications contain 14 pages including the cover and appendix.
If you have any objections, please contact us before issuing purchasing order.

Handle this document carefully for it contains material protected by international copyright law. Any reproduction, full or in part, of this material is prohibited without the express written permission of the company.

When using the products covered herein, please observe the conditions written herein and the precautions outlined in the following paragraphs. In no event shall the company be liable for any damages resulting from failure to strictly adhere to these conditions and precautions.

(1) Please do verify the validity of this part after assembling it in customer’s products, when customer wants to make catalogue and instruction manual based on the specification sheet of this part.

(2) The products covered herein are designed and manufactured for the following application areas. When using the products covered herein for the equipment listed in paragraph (3), even for the following application areas, be sure to observe the precautions given in Paragraph (3). Never use the products for the equipment listed in Paragraph (4).
   - Office electronics
   - Instrumentation and measuring equipment
   - Machine tools
   - Audiovisual equipment
   - Home appliances
   - Communication equipment other than for trunk lines

(3) These contemplating using the products covered herein for the following equipment which demands high reliability, should first contact a sales representative of the company and then accept responsibility for incorporating into the design fail-safe operation, redundancy, and other appropriate measures for ensuring reliability and safety of the equipment and the overall system.
   - Control and safety devices for airplanes, trains, automobiles, and other transportation equipment
   - Mainframe computers
   - Traffic control systems
   - Gas leak detectors and automatic cutoff devices
   - Rescue and security equipment
   - Other safety devices and safety equipment, etc.

(4) Do not use the products covered herein for the following equipment which demands extremely high performance in terms of functionality, reliability, or accuracy.
   - Aerospace equipment
   - Communications equipment for trunk lines
   - Control equipment for the nuclear power industry
   - Medical equipment related to life support, etc.

(5) Please direct all queries and comments regarding the interpretation of the above four Paragraphs to a sales representative of the company.

Please direct all queries regarding the products covered herein to a sales representative of the company.
1. Application
These specifications apply to the light emitting diode module Model No. GW5BTC65K00.
[ High color rendering Daylight (from InGaN Blue LED chip + Phosphor) LED module ]
Main application : Lighting

2. External dimensions and equivalent circuit ------------------------------- Refer to Page 2.

3. Ratings and characteristics ----------------------------------------------- Refer to Page 3 - 5.
   3-1. Absolute maximum ratings
   3-2. Electro-optical characteristics
   3-3. Derating curve
   3-4. Characteristics diagram (TYP.)

4. Reliability --------------------------------------------------------------- Refer to Page 6.
   4-1. Test items and test conditions
   4-2. Failure criteria

5. Quality level ------------------------------------------------------------- Refer to Page 7.
   5-1. Applied standard
   5-2. Sampling inspection
   5-3. Inspection items and defect criteria

   6-1. Chromaticity rank table
   6-2. Packing
   6-3. Label
   6-4. Indication printed on product

7. Precautions ---------------------------------------------------------------- Refer to Page 10 - 12.
2. External dimensions and equivalent circuit

Top view

Side view

(Note) Values inside parentheses are reference values.
External dimension of ceramic substrate is the indication of maximum length at each side.

Equivalent circuit

(Note) 3 series × 8 parallel = 24 pcs of LEDs

<table>

</tbody>
</table>

### 4-2. Failure criteria

<table>
<thead>
<tr>
<th>No.</th>
<th>Parameter</th>
<th>Symbol</th>
<th>Failure criteria</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Forward Voltage</td>
<td>$V_F$</td>
<td>$V_F &gt; \text{U.S.L} \times 1.1$</td>
</tr>
<tr>
<td>2</td>
<td>Luminous Flux</td>
<td>$\Phi$</td>
<td>$\Phi &lt; \text{Initial value} \times 0.7$</td>
</tr>
</tbody>
</table>

(Note) U.S.L. stands for Upper Specification Limit.
5. Quality level

5-1. Applied standard  
ISO2859-1

5-2. Sampling inspection  
A single normal sampling plan, level S-4.

5-3. Inspection items and defect criteria

<table>
<thead>
<tr>
<th>No.</th>
<th>Item</th>
<th>Defect criteria</th>
<th>Classification</th>
<th>AQL</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>No radiation</td>
<td>No light emitting</td>
<td>Major defect</td>
<td>0.1%</td>
</tr>
</tbody>
</table>
| 2   | Electro-optical characteristics | Not conforming to the specification  
(Forward voltage, Luminous flux and Chromaticity) |                       |      |
| 3   | External dimensions         | Not conforming to the specified dimensions  
(External dimensions of ① and ② shown in Page 2) |                       |      |
| 4   | Appearance                  | Nonconformity observed in product appearance is determined  
as defective only when electro-optical characteristics is affected by.  
<If any question arises regardless of above mentioned criterion>  
■ Foreign material, scratch, or bubble at emitting area: 0.8 mm φ  
■ Fiber generation at emitting area: 0.2 mm in width and 2.5 mm in length  
■ Foreign material at connection terminal: 0.8 mm φ  
■ Substrate burr on edge: Over dimension tolerance | Minor defect         | 0.4% |

(Note) Products with removable foreign material attached on is not determined to be defective.
6. Supplements

6-1. Chromaticity rank table

(Tolerance: x, y ± 0.01)

(I_p = 360 mA, T_c = 25 °C)

<table>
<thead>
<tr>

</table>

Chromaticity Diagram
6-2. Packing
- One tray composed of 80 pieces
- 5 trays (400 pieces) and one upper lid-tray in one moisture-proof bag
- 2 bags (800 pieces) in one carton
- Dimensions of outer carton: 235 × 220 × 90 mm (Reference value)
(Note 1) There are cases of one carton composed of one bag. (400 pieces)
(Note 2) State of packing is subject to change.

<table>
<thead>
<tr>
<th>Outer carton</th>
<th>One bag</th>
<th>One tray</th>
</tr>
</thead>
<tbody>
<tr>
<td>400 pieces × 2 bags = 800 pieces</td>
<td>80 pieces × 5 trays = 400 pieces</td>
<td>10 × 8 = 80 pieces</td>
</tr>
</tbody>
</table>

6-3. Label
Following label is attached on moisture-proof bags.

1) Lot No. indication

<table>
<thead>
<tr>
<th>5 0 0 3 G 0 1 0 1 A</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Production plant code</td>
</tr>
<tr>
<td>2 Shipping year (Year last digit)</td>
</tr>
<tr>
<td>3 Shipping month (1～9 or O, N, D)</td>
</tr>
<tr>
<td>4 Fixed code G</td>
</tr>
<tr>
<td>5 Shipping date (01～31)</td>
</tr>
<tr>
<td>6 Serial No.</td>
</tr>
<tr>
<td>7 Fixed code A</td>
</tr>
</tbody>
</table>

6-4. Indication printed on product
Model No. and control No. are indicated on substrate surface.

1) Model No.
Abbreviated Model No. "5BTC65K00" is indicated.

2) Control No.
Indicated as follows;

- Model number
- Quantity and rank
- Lot No.
- EIAJ C-3 Bar code
- Production country

```
Model No.  GW5BTC65K00
Control No. M 10 C0 1 1
```

Date of production (01～31)
Rank: Chromaticity rank is indicated as follows;
Rank 1 → 1
7. Precautions

① Storage conditions
   Please follow the conditions below.
   • Before opened: Temperature 5 ~ 30 ℃, Relative humidity less than 60 %.
     (Before opened LED should be used within a year)
   • After opened: Temperature 5 ~ 30 ℃, Relative humidity less than 60 %.
     (Please apply soldering within 1 week)
   • After opened LED should be kept in an aluminum moisture proof bag with a moisture
     absorbent material (silica gel).
   • Avoid exposing to air with corrosive gas.
     If exposed, electrode surface would be damaged, which may affect soldering.

② Usage conditions
   This product is not designed for the use under any of the following conditions.
   Please confirm performance and reliability well enough if you use under any of the following conditions;
   • In a place with a lot of moisture, dew condensation, briny air, and corrosive gas.
     (Cl, H2S, NH3, SO2, NOX, etc.)
   • Under the direct sunlight, outdoor exposure, and in a dusty place.
   • In water, oil, medical fluid, and organic solvent.

③ Heat radiation
   If forward current (I_f) is applied to single-state module at any current, there is a risk of damaging LED
   or emitting smoke.
   Equip with specified heat radiator, and avoid heat stuffed inside the module.

④ Installation
   Material of board is alumina ceramic. If installed inappropriately, trouble of no radiation may occur due to
   board crack or overheat. Please take particular notice for installation.
   Refer to the following cautions on installation.
   • Apply thermolysis adhesive, adhesive sheet or peculiar connector when mounted on heat radiator.
     In case of applying adhesive or adhesive sheet only, check the effectiveness and reliability before fixing.
     If LED comes off from heat radiator, unusual temperature rise entails hazardous phenomena including
     device deterioration, coming off of solder at leads, and emitting smoke.
   • When LED device is mechanically fixed or locked, Please take into consideration regarding the method of
     attachment due to fail from stress.
   • Avoid convexly uneven boards.
     Convex board is subject to substrate cracking or debasement of heat release.
   • It is recommended to apply adhesive or adhesive sheet with high thermal conductivity
     for radiation of heat effectively.
   • Please take care about the influence of color change of adhesive or adhesive sheet in initial and long term
     period, which may affect light output or color due to change of reflectance from backside.
• Do not touch resin part including white resin part on the surface of LED.
No light emission may occur due to damage of resin or cutting wire of LEDs by outer force.
When using tweezers, please handle by ceramic substrate part and avoid touching resin part.
For mounting, please handle by side part of ceramic or the specified area shown below.

5 Connecting method
In case of solder connecting method, follow the conditions mentioned below.
• Use Soldering iron with thermo controller (tip temperature 380 °C), within 5 seconds per one place.
• Secure the solderwettability on whole solder pad and leads.
• During the soldering process, put the ceramic board on materials whose conductivity is poor enough not to radiate heat of soldering.
• Warm up (with using a heated plate) the substrate is recommended before soldering.
  (preheat condition: 100 °C ~ 150 °C, within 60 sec)
• Avoid touching a part of resin with soldering iron.
• This product is not designed for reflow and flow soldering.
• Avoid such lead arrangement as applying stress to solder-applied area.
• Please do not detach solder and make re-solder.
• Please solder evenly on each electrodes.
• Please prevent flux from touching to resin.

6 Static electricity
This product is subject to static electricity, so take measures to cope with it.
Install circuit protection device to drive circuit, if necessary.

7 Drive method
• Any reverse voltage cannot be applied to LEDs when they are in operation or not.
Design a circuit so that any flow of reverse or forward voltage can not be applied to LEDs when they are out of operation.
• Module is composed of LEDs connected in both series and parallel.
Constant voltage power supply runs off more than specified current amount due to lowered V_F caused by temperature rise.
Constant current power supply is recommended to drive.

8 Cleaning
Avoid cleaning, since silicone resin is eroded by cleaning.

9 Color-tone variation
Chromaticity of this product is monitored by integrating sphere right after the operation.
Chromaticity varies depending on measuring method, light spread condition, or ambient temperature.
Please verify your actual conditions before use.
Safety

- Looking directly at LEDs for a long time may result in hurt your eyes.
- In case that excess current (over ratings) are supplied to the device, hazardous phenomena including abnormal heat generation, emitting smoke, or catching fire can be caused.
  Take appropriate measures to excess current and voltage.
- In case of solder connecting method, there is a possibility of fatigue failure by heat.
  Please fix the leads in such case to protect from short circuit or leakage of electricity caused by contact.
- Please confirm the safety standards or regulations of application devices.
- Please careful not to injure your hand by edge of ceramic substrate.

Other cautions

Guarantee covers the compliance to the quality standards mentioned in the Specifications, however it does not cover the compatibility with application of the end-use, including assembly and usage environment.

In case any quality problems occurred in the application of end-use, details will be separately discussed and determined between the parties hereto.
