

# Ambersil MAKE YOUR MARK!

## VIBRANT long lasting paint pens

Paint markers are used in applications where a traditional ink permanent marker would be unable to effectively mark the surface. Benefits:

- Opacity – can write on all dark backgrounds and still be clear
- Dirt & grime – can write on surfaces which have residue on them
- Bleed – paint won't bleed through primers, unlike ink markers
- Longevity – paint is fade resistant and lasts longer than ink
- Valve-action – prevents paint drying in barrel when lid is left off

Use Ambersil paint Marker Pens for all your marketing needs:

- Component identification
- Pipeline identification
- Distribution & shipping packages
- Quality control checks
- Metal working & marking
- & more...

### MORE COLOURS, MORE CHOICE
