

DVI Digital Monitor Cable

Featuring the unique Digital Visual Interface (DVI) connector, the cables are referred to as DVI/D for use between mother board, graphics cards and monitors fitted with the same interface termination.

Features:

- Connects host device to a display unit supporting high resolution video signals
- Commonly fitted to digital monitors - either instead of or alongside the analogue VGA interface
- Supports bandwidths up to 165 Mhz
- Manufactured using UL 20276 cable and high quality moulded connectors
