**Universal Master Rack Panel with 6 Openings**

L-com's Universal Series offers installers the ability to customize their installation with different connections within a single rack panel. The Universal Series panels can save time, money and rack space in an installation project. The master panels feature six punched rectangular openings that will accept any of the numerous sub-panels shown in this catalog. Sub-panel openings are 2.20" x 2.75".

**Universal Series Blank Sub-Panels**

Universal Series blank sub-panels can be used to cover unused openings or may be used to customize a panel assembly. These panels come in 3 different styles for users to choose from: Black anodized aluminum, White high impact plastic, Blue or Black steel. The aluminum and plastic panels offer the easiest option for custom drilling or punching holes. The Blue and Black steel panels are constructed of sturdy cold rolled steel for durability. Each sub-panel is equipped with four pre-tapped holes to accept the four 6-32 mounting screws which are supplied.

**Building Custom Configurations with L-com's Universal Rack Panel System**

STEP 1

Select a rack panel suitable for your application.

STEP 2

Now select a ready made sub-panel that works with your rack panel.

STEP 3

Using a Phillips or Flat screwdriver, install your sub-panels in the master rack panel.
